MOTION CONTROL DRIVES

SINAMICS S200 Servo drive system

[siemens.com/d37-1](https://www.siemens.com/d37-1)

Dear Customer,

We are pleased to present you with the new edition of the Catalog D 37.1 · November 2023.

The catalog provides a comprehensive overview of the SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, a SIMOTICS S-1FL2 servomotor and a matching MOTION-CONNECT connection system.

In addition to updates and technical adjustments, the new edition of the catalog has mainly been expanded to include the Pulse Train Input version (PTI) of the SINAMICS S200 servo converters.

The products listed in this catalog are also included in SiePortal.

Please contact your local Siemens office for additional information.

Up-to-date information about SINAMICS S200 is available online at

www.siemens.com/sinamics-s200

You can access SiePortal online at

<https://sieportal.siemens.com>

Your personal contact is keen to receive your suggestions and recommendations for improvement. You can find your contact in our contact database at

www.siemens.com/automation-contact

We hope that you will often enjoy using Catalog D 37.1 · November 2023 as a selection and ordering reference document and wish you every success with our products and solutions.

With kind regards,

Frank Golüke
Vice President
General Motion Control
Siemens AG, Digital Industries, Motion Control

Motion beyond expectations

Drives move the industries. But how can they make them more efficient, more reliable and more sustainable – and exceed all expectations while they are doing it? Our answer: Siemens Xcelerator for Digital Drivetrain.

Digital solutions for Drivetrain Design and Drivetrain Health

Combine the real and the digital world to reach the next level of efficiency and sustainability in your drivetrain value chain: with suitable digital solutions for drivetrain design and drivetrain health.

Drivetrain Design:

Simplify and shorten the engineering steps to get faster and more efficiently from concept to the commissioned drivetrain.

Drivetrain Health:

Reduce total cost of ownership for your equipment and machine park – energy, maintenance, downtime.

[siemens.com/digital-drivetrain](https://www.siemens.com/digital-drivetrain)

Digitalization along the drivetrain value chain

Dimension

Accurate in motion: Dimension your motors, gearboxes, and complete drivetrains digitally with greater precision – for greater reliability and energy efficiency.

Simulate

Faster in motion: Add the digital twin of the drivetrain to your machine simulation to speed up your design and engineering phases and to accelerate your time-to-market!

Connect

Data in motion: Acquire high-quality raw data and connect your entire drivetrains or machines to cloud or on-premise platforms – for a consistent and secure data flow.

Optimize

Better in motion: Analyze and visualize drivetrain and machine data in digital solutions and apps to identify optimization potentials and concrete actionable measures how to tap it.

Use cases for digital drivetrain technology

Condition monitoring for drivetrains

Healthy in motion: Gain valuable insights into your drivetrain to optimize maintenance, system availability, cost efficiency, and sustainability: Discover intelligent digital condition monitoring for your drivetrains!

Are your drivetrains fit enough for tough times?

The industries are expected to produce ever more efficiently, ever more sustainably and ever more cost-effectively. And if you can't do that, it's easier to be left behind by the competition. Use digitalization and the data from your motors and converters to optimize your competitiveness – and to keep your production in motion.

What if you consume too much electricity?

With digital solutions and digital drive technology, you can significantly reduce your share of this!

What if you waste too much energy?

Digitalization enables you to detect energy waste and impending system down-times at an early stage so that you can take counter-measures in due time!

What if your motors are incorrectly designed?

Digital tools make it quicker and easier to correctly design your drive components!

What if your drives fail unexpectedly?

With digital solutions, you can identify risks in your drivetrain at an early stage and react before a failure occurs.

"Our digital solutions transform your drivetrain value chain to the next level of efficiency and sustainability."

TIA Selection Tool – quick, easy, smart configuration

For you to get the most out of our portfolio quickly and easily.

Do you always need the optimum configuration for planning your project?

For your application we offer the TIA Selection Tool to support all project planners, beginners and experts alike.

No detailed portfolio knowledge is necessary.

TIA Selection Tool is available for download as a free desktop version or a cloud variant.

Your Advantages

Quick

- Configure a complete project with just a few entries – without a manual, without special knowledge
- Import and export of hardware configuration to TIA Portal or other systems
- Ideal visualization of the projects to be configured

Easy

- Tool download either as desktop version or web-based cloud version
- Technically always up-to-date about product portfolio and innovative approaches
- Highly flexible, secure, cross-team work in the cloud
- Direct ordering in SiePortal

Smart

- Smart selection wizard for error-free configuration and ordering
- Configuration options can be tested and simulated in advance
- Library for archiving sample configurations

The TIA Selection Tool is a completely paperless solution.

Download it now:

Decarbonization

Ethics

Governance

Resource Efficiency

Equity

Employability

As a company, Siemens considers environmental, social and governance (ESG) criteria from all angles with its DEGREE framework (decarbonization, ethics, governance, resource efficiency, equity and employability). We are not only committed to reducing the carbon footprint in our own operations to net zero by 2030, but also helping our customers achieve their decarbonization and sustainability goals.

Mission & strategy

As a focused technology company, Siemens is committed to addressing the world's most profound challenges by leveraging the synergies between digitalization and sustainability.

Technology with aim and purpose

We develop technologies that connect the real and digital worlds and enable our customers to positively transform the industries that form the backbone of our economy: industry, infrastructure, transportation and healthcare.

Our contribution

Siemens makes an impact every day by providing innovative solutions in response to challenges relating to environmental protection, decarbonization, health and safety. Innovative solutions that have a clear goal: to make the world more sustainable, more integrative and a better place to live.

Sustainability facts

For almost 175 years, Siemens has been driven by the desire to improve the lives of people around the world with our technologies.

Siemens EcoTech is an environmental product performance label designed to drive the sustainable transformation of industry and infrastructure. The label gives you transparency on the performance of our certified products across environmental relevant criteria, enabling you to make informed choices to support your sustainability goals, [see www.siemens.com/SiemensEcoTech](http://www.siemens.com/SiemensEcoTech).

System overview

The SINAMICS converter family

Overview

Integration in automation

Totally Integrated Automation and communication

SINAMICS is an integral component of the Siemens "Totally Integrated Automation" concept. Integrated SINAMICS systems covering configuration, data storage, and communication at automation level ensure low-maintenance solutions with the SIMATIC, SIMOTION and SINUMERIK control systems.

Depending on the application, the appropriate variable frequency drives can be selected and incorporated in the automation concept. With this in mind, the drives are clearly subdivided into their different applications. A wide range of communication options (depending on the drive type) are available for establishing a communication link to the automation system:

- PROFINET
- PROFIBUS
- EtherNet/IP
- Modbus TCP
- Modbus RTU
- AS-Interface
- BACnet MS/TP

Applications

SINAMICS is the comprehensive converter family from Siemens designed for machine and plant engineering applications. SINAMICS offers solutions for all drive tasks:

- Simple pump and fan applications in the process industry
- Demanding single drives in centrifuges, presses, extruders, elevators, as well as conveyor and transport systems
- Drive line-ups in textile, plastic film, and paper machines as well as in rolling mill plants
- Highly dynamic servo drives for machine tools, as well as packaging and printing machines

Overview

SINAMICS as part of the Siemens modular automation system

G_D011_XX_00515c

Innovative, energy-efficient and reliable drive systems and applications as well as services for the entire drive train

The solutions for drive technology place great emphasis on the highest productivity, energy efficiency and reliability for all torque ranges, performance and voltage classes.

Siemens offers not only the right innovative variable frequency drive for every drive application, but also a wide range of energy-efficient motors for combination with SINAMICS.

Furthermore, Siemens supports its customers with global pre-sales and after-sales services, with over 295 service points in 130 countries – and with special services e.g. application consulting or motion control solutions.

Energy efficiencyEnergy management process

Efficient energy management consultancy identifies the energy flows, determines the potential for making savings and implements them with focused activities.

Almost two thirds of the industrial power requirement is from electric motors. This makes it all the more important to use drive technology permitting energy consumption to be reduced effectively even in the configuration phase, and consequently to optimize plant availability and process stability. With SINAMICS, Siemens offers powerful energy efficient solutions which, depending on the application, enable a significant reduction in electricity costs.

System overview

1

The SINAMICS converter family

Overview

Up to 70 % potential for savings using variable speed operation

SINAMICS enables great potential for savings to be realized by controlling the motor speed. In particular, huge potential savings can be recovered from pumps, fans and compressors which are operated with mechanical throttle and valves. Here, changing to variable-speed drives brings enormous economic advantages. In contrast to mechanical control systems, the power consumption at partial load operation is always immediately adjusted to the demand at that time. So energy is no longer wasted, permitting savings of up to 60 % – in exceptional cases even up to 70 %. Variable-speed drives also offer clear advantages over mechanical control systems when it comes to maintenance and repair. Current spikes when starting up the motor and strong torque surges become things of the past – and the same goes for pressure waves in pipelines, cavitation or vibrations which cause sustainable damage to the plant. Smooth starting and ramp-down relieve the load on the mechanical system, ensuring a significantly longer service life of the entire drive train.

Regenerative feedback of braking energy

In conventional drive systems, the energy produced during braking is converted to heat using braking resistors. Energy produced during braking is efficiently recovered to the supply system by versions of SINAMICS G and SINAMICS S drives with regenerative feedback capability and these devices do not therefore need a braking resistor. This permits up to 60 % of the energy requirement to be saved, e.g. in lifting applications. Energy which can be reused at other locations on a machine. Furthermore, this reduced power loss simplifies the cooling of the system, enabling a more compact design.

Energy transparency in all configuration phases

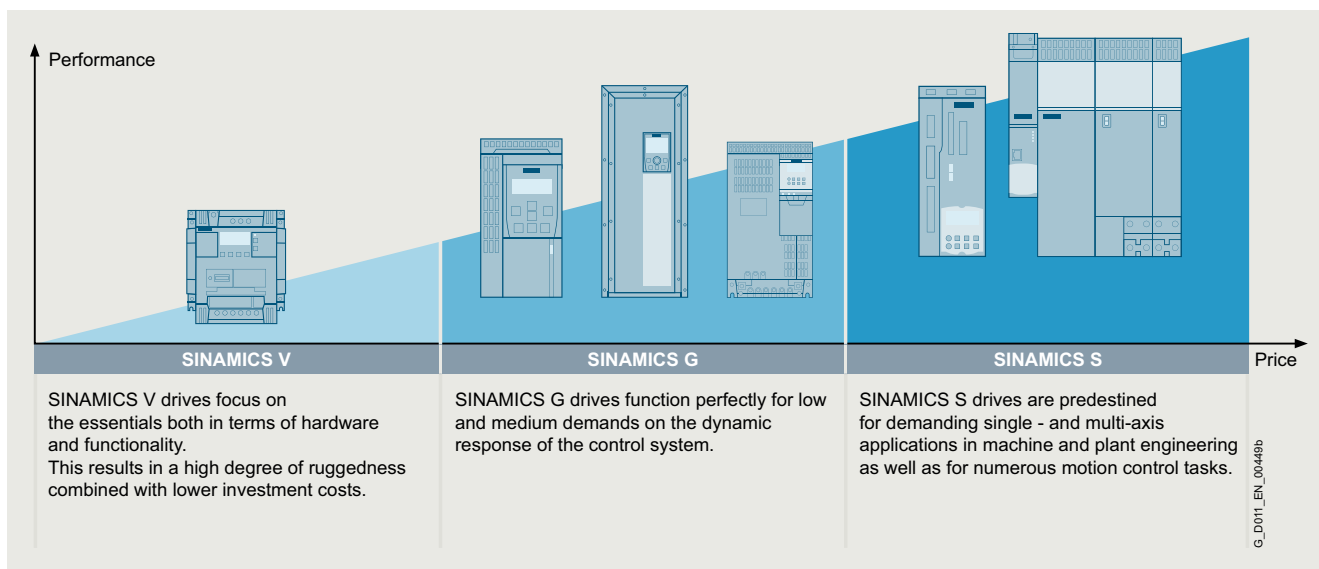

Early on, in the configuration phase, the SIZER for Siemens Drives engineering tool (integrated into TIA Selection Tool) provides information on the specific energy requirement. The energy consumption across the entire drive train is visualized and compared with different plant concepts.

SINAMICS in combination with energy-saving motors

Engineering integration stretches beyond the SINAMICS converter family to higher-level automation systems, and to a broad spectrum of energy-efficient motors with a wide range of performance classes, which, compared to previous motors, are able to demonstrate up to 10 % greater efficiency.

Variants

Depending on the application, the SINAMICS range offers the ideal variant for any drive task.

Overview

Platform concept

All SINAMICS variants are based on a platform concept. Joint hardware and software components, as well as standardized tools for dimensioning, configuration, and commissioning tasks ensure high-level integration across all components. SINAMICS handles a wide variety of drive tasks with no system gaps. The different SINAMICS variants can be easily combined with each other.

Quality management according to EN ISO 9001

SINAMICS conforms to the most exacting quality requirements. Comprehensive quality assurance measures in all development and production processes ensure a consistently high level of quality.

Of course, our quality management system is certified by an independent authority in accordance with EN ISO 9001.

Integrated system configuration

Siemens offers perfectly matched drive components with which you can meet your requirements. The drive components reveal their true strengths over the full range from engineering and commissioning through to operation: Integrated system configuration is performed using the Siemens Product Configurator: Just select a motor and a converter and design them with the SIZER for Siemens Drives engineering tool (integrated into TIA Selection Tool). The STARTER and SINAMICS Startdrive commissioning tools integrate the motor data and at the same time simplify efficient commissioning. All drive components are incorporated in the TIA Portal – this simplifies engineering, commissioning and diagnostics.

Using the SINAMICS selection guide

The varying range of demands on modern variable frequency drives requires a large number of different types. Selecting the optimum drive has become a significantly more complex process. The application matrix shown simplifies this selection process considerably, by suggesting the ideal SINAMICS drive for examples of typical applications and requirements.

- The application type is selected from the vertical column
 - Pumping, ventilating, compressing
 - Moving
 - Processing
 - Machining
- The quality of the motion type is selected from the horizontal row
 - Basic
 - Medium
 - High

Further information about SINAMICS is available on the internet at www.siemens.com/sinamics

Practical application examples and descriptions are available on the internet at www.siemens.com/sinamics-applications

¹⁾ Industry-specific converters.

²⁾ Information on the SIMATIC ET 200pro FC-2 frequency converter is available in Catalog D 31.2 and at www.siemens.com/et200pro-fc

Overview**SINAMICS S200 servo drive system**

Example: SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, 200 ... 240 V 1 AC / 3 AC, PROFINET, frame size FSB, a SIMOTICS S-1FL2 servomotor, shaft height 30, metal hybrid connector, outlet direction drive end (DE) and MOTION-CONNECT 350 dual cables for power and communication

The SINAMICS S200 servo drive system is a single axis AC/AC servo drive system with compact design, high dynamic performance, ease of use and high reliability for motion control applications in standard servo motion market. It comprises SINAMICS S200 servo converters, SIMOTICS S-1FL2 servomotors, MOTION-CONNECT 350 and 380 connection systems and engineering tools.

System componentsSINAMICS S200 servo converters

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers. With the SINAMICS S200, the PROFINET function "Dynamic Frame Packing" (DFP) is available, which enables the connection of large numbers of axes to a SIMATIC controller.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

SIMOTICS S-1FL2 servomotors

With flexible encoder options, including absolute encoder 17-bit singleturn, 21-bit singleturn and 21-bit singleturn + 12-bit multiturn, the system provides precise and accurate performance. The encoders can be used without a battery, making it easy to operate and maintenance.

- Low Inertia for high dynamic performance
- Medium Inertia for dynamic and smooth operational performance
- High Inertia for smooth operational performance

MOTION-CONNECT 350 and 380 connection systems

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

System overview

1

SINAMICS S200 servo drive system

Benefits

Performance-optimized

Dynamic

Ideal for dynamic applications thanks to:

- fast current controllers
- 8 kHz PWM frequency

Fast

The system enables seamless communication to controllers via PROFINET IRT, providing fast and efficient data exchange and control.

Overload capacity

SIMOTICS S-1FL2 servomotors providing up to 350 % overload capacity, can handle sudden increases in load without compromising performance or efficiency, ensuring uninterrupted operation and increased productivity.

Compact

To enable more efficient use of cabinet space and improve application system design, both servo converters and servomotors are further optimized in compactness thanks to their high power density. More important, for side-by-side installation, SINAMICS S200 servo converters require only 1 mm for 200 V series and 10 mm for 400 V series.

Easy to use

Easy setup

All frame sizes of SINAMICS S200 servo converters have an integrated holding brake control ¹⁾, which does not require connection to an external relay, and the integrated brake resistor to dissipate the regenerative power for fast braking, which is easy and cost effective for applications.

Easy engineering.

With directly integrated into SINAMICS Startdrive, and the embedded SINAMICS web server for SINAMICS S200, variety of user-friendly features make the servo drive system easy for engineering. Additionally, advanced One Button Tuning (OBT) enables machines to achieve a high dynamic performance within just seconds.

Easy implementation

The system is designed to meet global standards and certifications, including CE, UKCA, UL, RCM, EAC, KC and SEMI F47, ensuring compliance with safety and quality regulations worldwide.

Fit for future

Digital engineering journey

Unlock potential with a seamless digital engineering journey, from selection and commissioning to diagnosis via TIA Selection Tool, Siemens Product Configurator and TIA Portal. More important, SINAMICS S200 servo drive system can be simulated with DriveSim Designer.

Scalable system

As a scalable system, users can get a seamless integrated motion control system together with SIMATIC controllers (e.g. SIMATIC S7-1500).

Safety & Security

The system includes a safety concept that features Safety Integrated Basic Function Safe Torque Off (STO), ensuring safe and reliable operation. You achieve defense in depth thanks to User Management and Access Control (UMAC) providing always active industrial security service.

Siemens EcoTech Profile (SEP) for SINAMICS S200

Siemens introduces a new label: Siemens EcoTech. It is an environmental declaration for products based on product-specific evaluations of sustainability relevant KPIs.

To provide maximum transparency, the Siemens EcoTech Profile (SEP) were created for all Siemens EcoTech products.

It is a Siemens-created, standardized product data sheet which gives insight about the product performance in environmental relevant criteria as well as about interpretation and comparison of data against an existing norm, standard or predecessor product.

You can find more information on the internet at:

<https://support.industry.siemens.com/cs/ww/en/ps/29596/cert?ci=5702>

www.siemens.com/SiemensEcoTech

Extended warranty

For SINAMICS S200 servo drive system, Siemens offers an optional extended warranty of up to 5½ years via **Service Protect**:

- Free for the first 6 months after registering the product at: <https://myregistration.siemens.com>
- Subject to a charge for a further 3 or 5 years of extended warranty for SINAMICS S200 servo converters.
- Subject to a charge for a further 1 or 2 years of extended warranty for SIMOTICS S-1FL2 servo motors.

You can find detailed information here:

<https://support.industry.siemens.com/cs/ww/en/sc/4842>

You can find the correct Service Protect product number for your SINAMICS S200 servo drive system using our simple configurator

www.siemens.com/serviceprotect

Concerning standard warranty please ask your partner at Siemens.

Your partner can be found in our Personal Contacts Database at:

www.siemens.com/automation-contact

¹⁾ Not available for SINAMICS S200 Basic servo converters.

SINAMICS S200 servo drive system

Integration

- ① Controller (for example SIMATIC S7-1500)
- ② Communication between the converter and the controller via setpoint cable
- ③ SINAMICS S200 converter product line (PTI version)
- ④ Engineering via LAN with the web server in the converter
- ⑤ MOTION-CONNECT 350 or MOTION-CONNECT 380 cables for connecting motor, motor holding brake and encoder
- ⑥ SIMOTICS S-1FL2 servomotor

System topology SINAMICS S200 servo drive system, Pulse Train Input version (PTI)

Integration

- ① Controller (for example SIMATIC S7-1500)
- ② Communication between the converter and the controller via PROFINET
- ③ SINAMICS S200 converter product line (PROFINET version)
- ④ Engineering via LAN with the web server in the converter
- ⑤ MOTION-CONNECT 350 or MOTION-CONNECT 380 cables for connecting motor, motor holding brake and encoder
- ⑥ SIMOTICS S-1FL2 servomotor

SINAMICS S200 servo drive system

Configuration

The following electronic configuring aids and engineering tools are available for the SINAMICS S200 servo drive system:

DriveSim Designer (firmware V6.2 or higher)

DriveSim Designer provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

More information is provided on the internet at:
www.siemens.com/drive-virtualization

You can find more information on DriveSim Designer in the Engineering tools section.

SINAMICS Selector app

Mobile selection guide for frequency converters

Siemens has developed the SINAMICS Selector app as a practical tool for finding article numbers for your SINAMICS converters in a power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220, SINAMICS S200 or SINAMICS S210: the app will provide you with the correct article numbers conveniently.

How does it work?

Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. Your preselection is the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:
www.siemens.com/sinamics-selector

Siemens Product Configurator

The Siemens Product Configurator helps you configure the optimum drive technology products for a number of applications – starting with gearboxes, motors, converters as well as the associated options and components and ending with controllers, software licenses and connection systems.

The Siemens Product Configurator can be used on the internet without requiring any installation. The Siemens Product Configurator can be found in SiePortal at the following address:
www.siemens.com/spc

You can find more information on the Siemens Product Configurator in the Engineering tools section.

Drive dimensioning of the SINAMICS S200 servo drive system with the TIA Selection Tool

The SINAMICS S200 servo drive system is easily configured with the TIA Selection Tool under the Drive Dimensioning plug-in. It provides support when selecting the hardware and firmware components necessary to implement a drive task. The plug-in encompasses the configuration of the entire drive system and allows the handling of individual drives.

- Intuitive user interface, menu-based operation and help
- Configuration of the SINAMICS S200 servo drive system
- Adjustable traversing cycles and various mechanical systems integrated for single-axis applications
- Interface to the TIA Portal and SiePortal

The TIA Selection Tool is available for free on the internet at
www.siemens.com/tia-selection-tool-standalone

You can find more information on the TIA Selection Tool in the Engineering tools section.

SINAMICS web server for SINAMICS S200

The converter can be brought easily and quickly into operation and optimized with the web server. Additional software does not need to be installed as access comes directly from a web browser.

You can find more information about the SINAMICS web server for SINAMICS S200 in the Engineering tools section.

SINAMICS Startdrive commissioning tool (TIA Portal)

SINAMICS Startdrive is a tool for configuring, commissioning, and diagnosing the SINAMICS converter family and is integrated into TIA Portal (V18 SP2 or higher).

The SINAMICS Startdrive has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. SINAMICS firmware V6.2 or higher is required for SINAMICS S200.

The SINAMICS Startdrive Advanced license is required for the Safety Integrated acceptance test.

The SINAMICS Startdrive commissioning tool is available for free on the internet at:
www.siemens.com/startdrive

You can find more information on the SINAMICS Startdrive commissioning tool in the Engineering tools section.

Technical specifications

General technical specifications

	SINAMICS S200 servo drive system		
	Low Inertia for high dynamic performance 200 V ... 240 V 1 AC / 3 AC	Medium Inertia for dynamic and smooth operational performance 200 V ... 240 V 1 AC / 3 AC or 380 V ... 480 V 3 AC	High Inertia for smooth operational performance 380 V ... 480 V 3 AC
SINAMICS S200 Basic servo converters

SINAMICS S200 servo drive system

Accessories

Accessories for SINAMICS S200 Basic and SINAMICS S200 servo converters

Description	Article No.
SINAMICS SD card 8 GB Parameter assignments, firmware and licenses for a converter can be stored on the memory card. • Empty • With firmware V6.2 • With firmware V6.3	6SL5970-0AA00-0AA0 6SL5570-0GC00-0AA0 6SL5570-0GD00-0AA0
SINAMICS Smart Adapter ²⁾ Wi-Fi solution for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New) ²⁾ and SINAMICS G220	6SL4950-0AJ00-0AA0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200 Basic / SINAMICS S200, Pulse Train Input version (PTI)	
Connector for setpoint cable 50-pin MDR connector	6SL3260-2NA00-0VA0
Setpoint cable with connector MDR 50-pin connector, free pins to controller side, length: 1 m	6SL3260-4NA00-1VB0
Setpoint cable with connectors on both sides and separate terminal block MDR 50-pin connector, terminal block to controller side, length: 0.5 m	6SL5562-0XX00-0AD0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200 Basic / SINAMICS S200, PROFINET version	
PROFINET I/O connector 20-pin	6SL3260-2MA00-0VA0
PROFINET I/O cable with 20-pin MDR connector, length: 1 m (3.28 ft)	6SL5562-1XX00-0AC0
PROFINET I/O adapter ¹⁾ for 20-pin MDR connector	6SL5562-1XX00-0AD0
Pre-assembled PROFINET cable with two RJ45 180° plugs, length: 1 m (3.28 ft)	6XV1871-5BH10
RJ45 data plug-in connector with 180° (straight) cable outlet	6GK1901-1BB10-2AA0
Standard PROFINET cable 4-core, sold by the meter, not assembled	6XV1840-2AH10
PROFINET patch cable For the networking of concatenated converters Industrial Ethernet TP cord, CAT 6 A, twisted pair line 4 × 2 cores, pre-assembled with two RJ45 connectors • 0.3 m (0.98 ft) • 0.5 m (1.64 ft)	6XV1870-3QE30 6XV1870-3QE50

For further information about PROFINET cables refer on the internet at: www.siemens.com/simatic-net

Recommended SIMATIC S7 controller

More information about SIMATIC S7-1500 and SIMATIC S7-1500 T-CPU controllers is available in Catalog ST 70 and on the internet at: www.siemens.com/simatic-s7-1500

Spare parts for SINAMICS S200 Basic and SINAMICS S200 servo converters

Description	Article No.
Shield connection kit including several shield plates and fixing screws	6SL5566-0AB00-0AA0
Terminal kits • for SINAMICS S200 • for SINAMICS S200 Basic	6SL5568-0XX00-0AA0 6SL5668-0XX00-0AA0
Replacement fans • for SINAMICS S200, 400 V version, FSC • for SINAMICS S200, 400 V version, FSD	6SL5560-0CE00-0AA0 6SL5560-0DE00-0AA0

Starter kit

Description	Article No.
SINAMICS S200 PN starter kit Scope of delivery: • SINAMICS S200 servo converter, PROFINET version, 200 V, 400 W • SIMOTICS S-1FL2 Low Inertia servomotor, shaft height 30, 400 W, IP65 degree of protection, without holding brake, shaft with feather key, with absolute encoder 21-bit singleturn • Pre-assembled dual motor connection cable, drive end, 3 m (9.84 ft) • Pre-assembled PROFINET I/O cable, 1 m (3.28 ft) The delivery quantity is limited to three units per customer.	6SL5990-0AE50-0AA0

Training cases

Description	Article No.
SINAMICS S200 training case PROFINET version Scope of delivery: • 2 × SINAMICS S200 servo converter, PROFINET version, 200 V, 100 W • 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn • 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn • 2 × Pre-assembled dual motor connection cable • Rail, prepared for installation of a controller, e.g. SIMATIC S7-1500 (controller not included in scope of delivery) • SIMATIC ET 200SP, PROFINET Interface Module The SINAMICS S200 training case is supplied as a trolley with a hood.	6AG1067-1AA42-0AA0
SINAMICS S200 training case Pulse Train Input version (PTI) ¹⁾ Scope of delivery: • 1 × SINAMICS S200 servo converter, Pulse Train Input version (PTI), 200 V, 100 W • 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn • 1 × Pre-assembled dual motor connection cable • 1 × SIMATIC S7-1200, compact CPU, CPU 1211C, DC/DC/DC • 1 × SIMATIC S7-1200, Communication Board CB 1241, RS485 The SINAMICS S200 training case Pulse Train Input version (PTI) is supplied as a trolley with a hood.	6AG1067-1AA43-0AA0

¹⁾ Available soon.²⁾ Release for SINAMICS S210 (New) available soon.

More information

Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right. With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:
www.siemens.com/sinamics-s200/documentation

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:
www.siemens.com/sinamics-s200

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:
www.siemens.com/sinamics-s200/configuration

SINAMICS S200 starter kit

Selection and ordering data

Description	Article No.
SINAMICS S200 PN starter kit	6SL5990-0AE50-0AA0
Scope of delivery:	
<ul style="list-style-type: none">• SINAMICS S200 servo converter, PROFINET version, 200 V, 400 W• SIMOTICS S-1FL2 Low Inertia servomotor, shaft height 30, 400 W, IP65 degree of protection, without holding brake, shaft with feather key, with absolute encoder 21-bit singleturn• Pre-assembled dual motor connection cable, drive end, 3 m (9.84 ft)• Pre-assembled PROFINET I/O cable, 1 m (3.28 ft)	
The delivery quantity is limited to three units per customer.	

System overview

Recommended SIMATIC S7 controller

Selection and ordering data

Recommended controller for SINAMICS S200 pulse train (PTI) version

SIMATIC S7-1200 Basic Controller for SINAMICS S200 pulse train (PTI) version							
Compact CPU expandable with Signal board or communication board	Communication modules	Signal Modules	Digital outputs	of which high-speed outputs (Pulse Train Output)	Work memory	CPU	Article No.
1	3	–	4	4 (100 kHz)	50 KB	CPU 1211C DC/DC/DC	6ES7211-1AE40-0XB0
		2	6	4 (100 kHz)	75 KB	CPU 1212C DC/DC/DC	6ES7212-1AE40-0XB0
		8	10	4 (100 kHz)	100 KB	CPU 1214C DC/DC/DC	6ES7214-1AG40-0XB0
					125 KB	CPU 1215C DC/DC/DC	6ES7215-1AG40-0XB0
				4 (1 MHz)	150 KB	CPU 1217C DC/DC/DC	6ES7217-1AG40-0XB0

One SIMATIC S7-1200 CPU can control up to 4 SINAMICS S200 axes. Each axis requires 2 high-speed digital outputs for the pulse train interface. The SIMATIC S7-1500 compact CPUs can also be connected to SINAMICS S200 via "pulse train".

Expansion for control of more than 2 axes

Signal boards, 0.1 A, 200 kHz, can be plugged directly into the CPU. One axis requires 2 high-speed digital outputs for controlling.

Digital outputs	Input voltage	Type	Article No.
2	5 V DC	SB 1223	6ES7223-3AD30-0XB0
	24 V DC		6ES7223-3BD30-0XB0
4	5 V DC	SB 1222	6ES7222-1AD30-0XB0
	24 V DC		6ES7222-1BD30-0XB0

For SINAMICS S200 PROFINET (PN) version, the AC/DC/RLY and DC/DC/RLY versions of SIMATIC S7-1200 are also possible (CPU 1211C, CPU 1212C, CPU 1214C and CPU 1215C).

SINAMICS S200 as a PROFINET I/O device with PROFIdrive supports technology objects and function blocks of SIMATIC S7-1200, SIMATIC S7-1500 and SIMATIC S7-1500 Technology CPU for speed and positioning control.

For further information about SIMATIC controllers please refer to Catalog ST 70 or to web page:

SINAMICS S200 servo converters

SINAMICS S200 Basic servo converters

Overview

SINAMICS S200 Basic servo converters

SINAMICS S200 Basic servo converters, 200 ... 240 V 1 AC / 3 AC, Pulse Train Input version (PTI), frame sizes FSA, FSB and FSC

SINAMICS S200 Basic servo converters, 200 ... 240 V 1 AC / 3 AC, PROFINET version, frame sizes FSA, FSB and FSC

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers. With the SINAMICS S200, the PROFINET function "Dynamic Frame Packing" (DFP) is available, which enables the connection of large numbers of axes to a SIMATIC controller.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

Accessories for SINAMICS S200 Basic servo converters

Description	Article No.
SINAMICS SD card 8 GB Parameter assignments, firmware and licenses for a converter can be stored on the memory card.	
• Empty	6SL5970-0AA00-0AA0
• With firmware V6.2	6SL5570-0GC00-0AA0
• With firmware V6.3	6SL5570-0GD00-0AA0
SINAMICS Smart Adapter ²⁾ Wi-Fi solution for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New) ²⁾ and SINAMICS G220	6SL4950-0AJ00-0AA0
Line filter Category C2 in IEC 61800-3 is attainable for motor cable lengths up to 30 m (98.5 ft) using a line filter.	
• ≤ 18 A for 200 ... 240 V 1 AC	6SL5550-0XB21-8CA0
• ≤ 5 A for 200 ... 240 V 3 AC	6SL3203-0BE15-0VA0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200 Basic, Pulse Train Input version (PTI)	
Connector for setpoint cable 50-pin MDR connector	6SL3260-2NA00-0VA0
Setpoint cable with connector MDR 50-pin connector, free pins to controller side, length: 1 m	6SL3260-4NA00-1VB0
Setpoint cable with connectors on both sides and separate terminal block MDR 50-pin connector, terminal block to controller side, length: 0.5 m	6SL5562-0XX00-0AD0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200 Basic, PROFINET version	
PROFINET I/O connector 20-pin	6SL3260-2MA00-0VA0
PROFINET I/O cable with 20-pin MDR connector, length: 1 m (3.28 ft)	6SL5562-1XX00-0AC0
PROFINET I/O adapter ¹⁾ for 20-pin MDR connector	6SL5562-1XX00-0AD0
Pre-assembled PROFINET cable with two RJ45 180° plugs, length: 1 m (3.28 ft)	6XV1871-5BH10
RJ45 data plug-in connector with 180° (straight) cable outlet	6GK1901-1BB10-2AA0
Standard PROFINET cable 4-core, sold by the meter, not assembled	6XV1840-2AH10
PROFINET patch cable For the networking of concatenated converters Industrial Ethernet TP cord, CAT 6 A, twisted pair line 4 × 2 cores, pre-assembled with two RJ45 connectors	
• 0.3 m (0.98 ft)	6XV1870-3QE30
• 0.5 m (1.64 ft)	6XV1870-3QE50

More information

Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Environmental Product Declaration (EPD)

Environmental Product Declarations (EPD) are available as PDFs for this product.

The EPD PDF provides brief and concise information about the ecological properties of a product.

You can find more information on the internet at:

<https://support.industry.siemens.com/cs/ww/en/ps/29596/cert?ci=5690>

Further documentation, such as the operating instructions, is available free on the internet at:

www.siemens.com/sinamics-s200/documentation

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

www.siemens.com/sinamics-s200

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

SINAMICS S200 servo converters, 380 ... 480 V 3 AC, PROFINET version, frame sizes FSA, FSB, FSC and FSD

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers. With the SINAMICS S200, the PROFINET function "Dynamic Frame Packing" (DFP) is available, which enables the connection of large numbers of axes to a SIMATIC controller.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

Function

	SINAMICS S200, Pulse Train Input version (PTI)	SINAMICS S200, PROFINET version
Closed-loop control		
Servo control with DSC	–	✓
Position control with pulse train	✓	–
Control functions		
Speed control with encoder	✓	✓
Dynamic Servo Control (DSC)	–	✓
Pulse train input (PTI)	✓	–
Basic positioner (EPOS)	–	✓
Ramp-function generator	✓	✓
Torque setpoint limitation	✓	✓
Current controller and current controller adaptation suitably adjusted for SIMOTICS S-1FL2 servomotors	✓	✓
One Button Tuning with moment of inertia estimator and reference model	✓	✓
Local measuring probe	–	✓
Simple brake control	✓	✓
Direction reversal without changing the setpoint channel	✓	✓
Travel to fixed stop	–	✓
Vertical axis	–	✓
Speed controller adaptation	✓	✓
Thermal monitoring for power unit and servomotor	✓	✓
Pulse train encoder output (PTO)	✓	✓
Protection functions		
Undervoltage DC link voltage	✓	✓
Overvoltage DC link voltage	✓	✓
Overcurrent power unit	✓	✓
Overcurrent motor	✓	✓
Overload power unit (I^2t)	✓	✓
Short-circuit	✓	✓
Ground fault	✓	✓
Temperature rise servomotor	✓	✓
Temperature rise power unit	✓	✓
Safety Integrated		
Safe Torque Off (STO)	✓	✓
Commissioning		
Identification of the SIMOTICS S-1FL2 servomotors via the electronic type plate	✓	✓
Automatic controller optimization	✓	✓

Accessories for SINAMICS S200 servo converters

Description	Article No.
SINAMICS SD card 8 GB Parameter assignments, firmware and licenses for a converter can be stored on the memory card.	
• Empty	6SL5970-0AA00-0AA0
• With firmware V6.2	6SL5570-0GC00-0AA0
• With firmware V6.3	6SL5570-0GD00-0AA0
SINAMICS Smart Adapter ²⁾ Wi-Fi solution for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New) ²⁾ and SINAMICS G220	6SL4950-0AJ00-0AA0
Line filter Category C2 in IEC 61800-3 is attainable for motor cable lengths up to 30 m (98.5 ft) using a line filter.	
• ≤ 18 A for 200 ... 240 V 1 AC, frame sizes FSA, FSB, FSC	6SL5550-0XB21-8CA0
• ≤ 5 A for 200 ... 240 V 3 AC, frame sizes FSA, FSB, FSC	6SL3203-0BE15-0VA0
• ≤ 5 A for 380 ... 480 V 3 AC, frame sizes FSA and FSB	6SL5550-0XE20-5CA0
• ≤ 12 A for 380 ... 480 V 3 AC, frame size FSC	6SL5550-0XE21-2CA0
• ≤ 20 A for 380 ... 480 V 3 AC, frame size FSD	6SL5550-0XE22-0CA0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200, Pulse Train Input version (PTI)	
Connector for setpoint cable 50-pin MDR connector	6SL3260-2NA00-0VA0
Setpoint cable with connector MDR 50-pin connector, free pins to controller side, length: 1 m	6SL3260-4NA00-1VB0
Setpoint cable with connectors on both sides and separate terminal block MDR 50-pin connector, terminal block to controller side, length: 0.5 m	6SL5562-0XX00-0AD0
Connecting cables and connectors for SIMATIC S7 controller and SINAMICS S200, PROFINET version	
PROFINET I/O connector 20-pin	6SL3260-2MA00-0VA0
PROFINET I/O cable with 20-pin MDR connector, length: 1 m (3.28 ft)	6SL5562-1XX00-0AC0
PROFINET I/O adapter ¹⁾ for 20-pin MDR connector	6SL5562-1XX00-0AD0
Pre-assembled PROFINET cable with two RJ45 180° plugs, length: 1 m (3.28 ft)	6XV1871-5BH10
RJ45 data plug-in connector with 180° (straight) cable outlet	6GK1901-1BB10-2AA0
Standard PROFINET cable 4-core, sold by the meter, not assembled	6XV1840-2AH10
PROFINET patch cable For the networking of concatenated converters Industrial Ethernet TP cord, CAT 6 A, twisted pair line 4 × 2 cores, pre-assembled with two RJ45 connectors	
• 0.3 m (0.98 ft)	6XV1870-3QE30
• 0.5 m (1.64 ft)	6XV1870-3QE50

More information

Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Environmental Product Declaration (EPD)

Environmental Product Declarations (EPD) are available as PDFs for this product.

The EPD PDF provides brief and concise information about the ecological properties of a product.

You can find more information on the internet at:

<https://support.industry.siemens.com/cs/ww/en/ps/29596/cert?ci=5690>

Further documentation, such as the operating instructions, is available free on the internet at:

www.siemens.com/sinamics-s200/documentation

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

www.siemens.com/sinamics-s200

and is also available via the Siemens Product Configurator on the internet.

SINAMICS S200 servo converters

Line-side components

Line filters

Overview

Example: Line filter for SINAMICS S200

It is recommended to use a line filter to protect the system from high frequency noise.

With one of the recommended line filters, IEC 61800-3 category C2 can be reached in combination with SINAMICS S200 for motor cable lengths up to 30 m (98.5 ft).

SINAMICS S200 servo converters

Line-side components

Recommended line-side overcurrent protection devices

Overview

Overcurrent protection devices are necessary for the operation of the converters. The following table lists recommendations for fuses.

- Siemens fuses of type 3NA3 and 3NW6 for use in the area of validity of IEC
- UL-listed fuses Class J for use in USA and Canada

Recommendations on further overcurrent protection devices are available at:

- For SINAMICS S200 and SINAMICS S200 Basic
www.siemens.com/sinamics-s200/ocpd

The Short Circuit Current Rating (SCCR) according to UL for industrial control cabinet installations to NEC Article 409 or UL 508A/508C or UL 61800-5-1 is as follows for Class J fuses for

- SINAMICS S200 and SINAMICS S200 Basic at 240 V 1 AC / 3 AC: 100 kA
- SINAMICS S200 at 480 V 3 AC: 65 kA

SCCR and ICC values for combination with further overcurrent protection devices are available at:

- For SINAMICS S200 and SINAMICS S200 Basic
www.siemens.com/sinamics-s200/ocpd

Notes for installations in Canada:

The converters are intended for line supply systems with overvoltage category III.

More information is available in the technical documentation on the internet at:

www.siemens.com/sinamics-s200/documentation

Additional information about the listed Siemens fuses is available in Catalog LV 10 as well as in SiePortal.

Overview

If the internal braking resistor cannot meet the braking requirements, an external resistor must be used, which converts the regenerative electrical energy into heat and thus provides significantly improved braking and deceleration capabilities.

When selecting a braking resistor, factors such as load inertia, deceleration time, speed change and braking duration must be taken into account according to the specific application and technology.

Overview

Sample memory card SINAMICS SD card

The parameter assignment, firmware and licenses for a converter can be stored on the SINAMICS SD memory card. When service is required, e.g. after the converter has been replaced and the data have been downloaded from the memory card the drive system is immediately ready for use again.

The memory card has the following functions:

- Parameter settings can be written from the memory card to the converter or saved from the converter to the memory card
- The memory card supports series commissioning without the use of a commissioning tool
- If firmware is stored on the memory card, the firmware can be upgraded/downgraded during startup

Notes:

In general, the converter can be operated without a memory card. However, it is necessary if licenses, such as the Extended Safety license, are required. The card must then remain permanently inserted.

SINAMICS Smart Adapter

Overview

SINAMICS Smart Adapter

SINAMICS Smart Adapter is a Wi-Fi solution for engineering, service and maintenance tasks for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New)¹⁾ and SINAMICS G220. The adapter is designed to be plugged into and powered from the service interface (X127) on the converter.

Benefits

- Wireless access to the converter-integrated web server via mobile users device
- Wireless access with SINAMICS Startdrive to the SINAMICS converters
- Portable and compact Wi-Fi solution for engineering, service and maintenance tasks for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New)¹⁾ and SINAMICS G220
- Advanced security technology
- Plug and Play interface for easy connectivity
- User friendly

Application

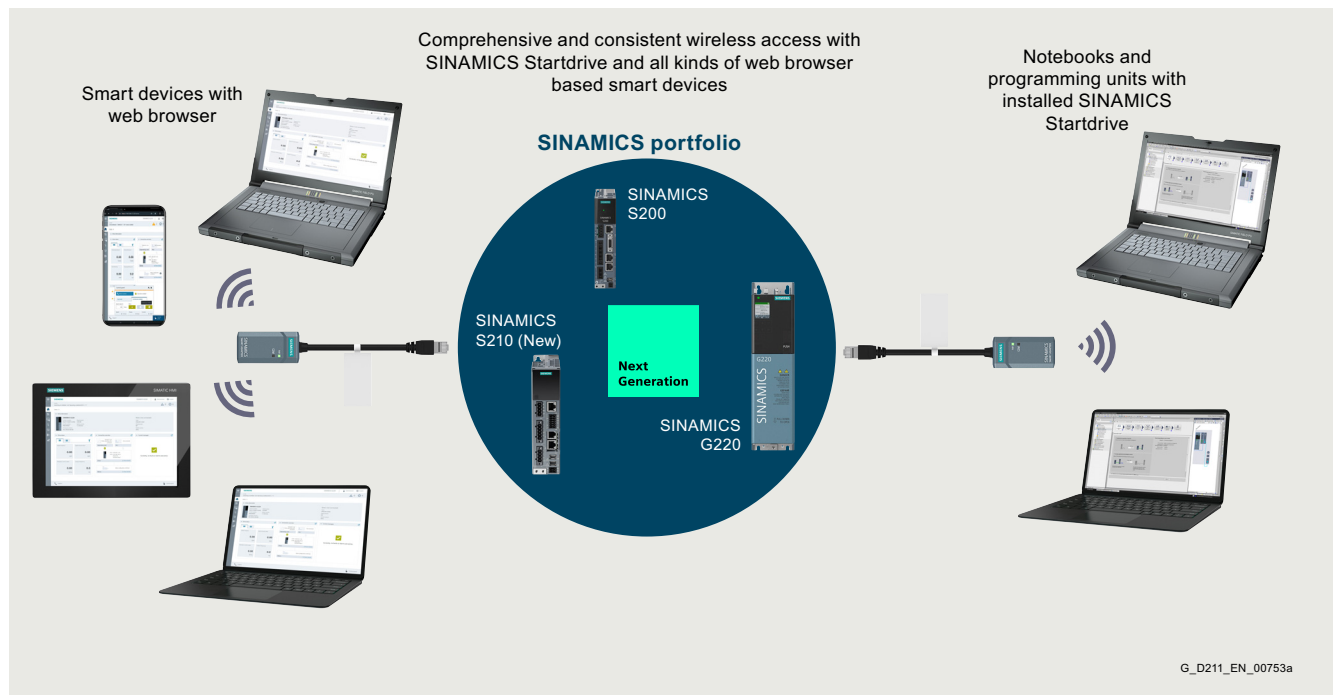

SINAMICS Smart Adapter is used in general industrial applications as an engineering solution for quick commissioning and service.

The adapter is especially valuable in areas, which are difficult to access due to their mechanical mounting locations. The use of SINAMICS Smart Adapter avoids cable spaghetti and tripping points during commissioning and service tasks and therefore prevents from occasional accidents.

Function

- Easy and quick service and commissioning via a wireless solution using the converter-integrated web server
- Interface that is suitable for the next generation of SINAMICS converters SINAMICS S200, SINAMICS S210 (New)¹⁾ and SINAMICS G220 and allows power supply of SINAMICS Smart Adapter directly from the converter.
- Advanced security with WPA3 protocol

Integration

Wireless access with SINAMICS Startdrive via SINAMICS Smart Adapter

¹⁾ Release for SINAMICS S210 (New) available soon.

Overview

SIMOTICS S-1FL2 Low Inertia servomotors, shaft heights 20, 30, 40 and 52

SIMOTICS S-1FL2 Medium Inertia servomotors, shaft heights 30, 40 and 48

SIMOTICS S-1FL2 High Inertia servomotors, shaft heights 45, 65 and 90

The SIMOTICS S-1FL2 servomotors are compact and highly dynamic synchronous motors for a wide range of uses in an industrial environment. They are characterized by high power density, degree of protection and overload capability.

The 1FL2 servomotors are perfectly suited to overcome the essential challenges in servo drive technology. The product range includes a limited number of variants and options and therefore enables a simple overview and selection. They form the core of the servomotors for the SINAMICS S200 servo drive system.

SIMOTICS S-1FL2 Low Inertia motors

Highest dynamic response through low inertia for highly dynamic applications with low moved masses.

SIMOTICS S-1FL2 Medium Inertia motors

Precise, stable control with medium masses to be moved with medium moment of inertia.

SIMOTICS S-1FL2 High Inertia motors

Precise, stable control with high masses to be moved with high moment of inertia.

Benefits

The SIMOTICS S-1FL2 servomotors fully exploit their strengths in the system with the SINAMICS S200 converter:

- Short adjustment and positioning times
- Quick and precise compensation of disturbances
- Stable closed loop control with high dynamic response

This is achieved by:

- Rapid control cycle
- High pulse frequency
- Complex rule algorithms
- High-resolution optical encoder with fast scanning
- Low moment of inertia of the motors
- High overload capability

Application

- Packaging machines
- Handling equipment
- Feed and withdrawal devices
- Stacking units
- Automatic assembly machines
- Laboratory automation
- Woodworking, glass and ceramic industries

Sound pressure level L_{pA} (1 m), max.	
According to ISO 1680 <ul style="list-style-type: none"> 1FL2102, 1FL2.03, 1FL2104 and 1FL2204 	60 dB(A) +3 dB(A) tolerance
<ul style="list-style-type: none"> 1FL2.05 and 1FL2304 	65 dB(A) +3 dB(A) tolerance
<ul style="list-style-type: none"> 1FL2306 and 1FL2310 	70 dB(A) +3 dB(A) tolerance
Encoder system	<ul style="list-style-type: none"> Absolute encoder 17-bit singleturn Absolute encoder 21-bit singleturn Absolute encoder 21-bit singleturn + 12-bit multiturn
Holding brake	Optional integrated holding brake
Connection	
<ul style="list-style-type: none"> 1FL2102, 1FL2.03, 1FL2104 and 1FL2204 	Double line with a metal hybrid connector
<ul style="list-style-type: none"> 1FL2.05 	Two cable connections with two metal circular connectors
<ul style="list-style-type: none"> 1FL23.. 	Three cable connections with three metal circular connectors
Paint finish	RAL 7016 (anthracite gray)
Certificates of suitability	CE, UKCA, cURus, EAC

Technical specifications

Regulations, standards, specifications

The motors comply with the appropriate standards and regulations, see table below.

As a result of the fact that in many countries the national regulations have been completely harmonized with the international IEC 60034-1 recommendation, there are no longer any differences with respect to coolant temperatures, temperature classes and temperature rise limits.

General specifications for rotating electrical machines	IEC 60034-1
Terminal designations and direction of rotation for electrical machines	IEC 60034-8
Types of construction of rotating electrical machines	IEC 60034-7
Cooling methods of rotating electrical machines	IEC 60034-6
Degrees of protection of rotating electrical machines	IEC 60034-5
Vibration severity of rotating electrical machines	IEC 60034-14
Noise limit values for rotating electrical machines	IEC 60034-9
Cylindrical shaft ends for electrical machines	DIN 748-3/IEC 60072-1

SIMOTICS S-1FL2 motors have UL approval from Underwriters Laboratories Inc. and are marked with the "UL Recognized Component" test symbol. This is used for components which are part of a larger product or system. This confirmed compliance with the corresponding US American and Canadian regulations, and allowed access to the North American market.

For SIMOTICS S-1FL2 motors, conformity with the relevant EC Directives 2006/95/EC and 2014/35/EU and the relevant standards EN 60034-1:2010, EN 60204-1:2006 is confirmed. By applying the CE mark to the product, Siemens AG confirms this for the product, and secures the free movement of goods within the European Union..

The UKCA (UK Conformity Assessed) marking is a new product marking that will be used for products being placed on the market in Great Britain (England, Wales and Scotland). It covers most products which previously required a CE marking.

The UKCA marking is mandatory for deliveries to the UK starting January 1, 2023.

The marking is typically applied to motors with a second nameplate bearing the UKCA label.

Degree of protection acc. to IEC 60034-5

A suitable degree of protection must be selected according to the operating and environmental conditions to protect the motor against damage caused by the ingress of water and other liquids, as well as dust and foreign bodies.

SIMOTICS S-1FL2 motors in the 1FL2102, 1FL2.03, 1FL2104 and 1FL2204 versions are produced concerning the shaft end with the IP54 degree of protection as standard (no shaft sealing ring) and in IP65 for the motor body, optionally in IP65 for the entire motor (with shaft sealing ring).

SIMOTICS S-1FL2 motors in the 1FL2.05 and 1FL23.. versions are produced as standard with a radial shaft seal ring in degree of protection IP65. This increases the protection against the ingress of liquids.

The degree of protection designation is composed from the code IP (for International Protection) and two code numbers for the protection against touching and penetration of foreign bodies, and the degree of protection against the ingress of water.

First code number

6: Protection against dust ingress and complete protection against touching

Second code number

4: Protection against splashwater from any direction

5: Protection against jet water from any direction

Recommended degrees of protection for three-phase motors

When cooling lubricants are used, protection against water alone is inadequate. The IP rating should only be considered as a guide value in this case. The motors may have to be protected by suitable covers. Attention must be paid to providing suitable sealing of the motor shaft for the selected degree of protection for the motor.

The following table can serve as a decision aid for selecting the proper degree of protection for motors. A permanent covering of liquid on the flange must be avoided when the motor is mounted with the shaft end facing upwards (IM V3).

Effect	General workshop environment	Water/ general cooling lubricant (95 % water, 5 % oil)
Dry	IP64	–
Humid/moist environment	–	IP64
Mis	–	IP65
Spraying water	–	IP65

SIMOTICS S-1FL2 servomotors for SINAMICS S200

Technical specifications

Type of construction, mounting position according to IEC 60034-7

SIMOTICS S-1FL2 motors are designed in type of construction IM B5. They may also be used in mounting positions IM V1 and IM V3.

Code 1	IM B5	IM V1	IM V3
Code 2	IM 3001	IM 3011	IM 3031
 <p>Horizontal flange mounting</p>		 <p>Flange mounting, output shaft pointing vertically downwards</p>	 <p>Flange mounting, output shaft pointing vertically upwards</p>

Shaft and flange accuracy in accordance with IEC 60072-1

Radial eccentricity tolerance of shaft in relation to housing axis
(referred to cylindrical shaft ends)

Motor	Shaft end D × L mm (in)	Radial eccentricity tolerance N μm
1FL2102	8 × 25 (0.31 × 0.98)	30
1FL2.03	14 × 30 (0.55 × 1.18)	35
1FL2104	19 × 40 (0.75 × 1.57)	40
1FL2204		
1FL2105	19 × 45 (0.75 × 1.77)	
1FL2205	19 × 40 (0.75 × 1.57)	
1FL2304	19 × 35 (0.75 × 1.38)	
1FL2306	22 × 58 (0.87 × 2.28)	
1FL2310	35 × 80 (1.38 × 3.15)	50

Concentricity and axial eccentricity tolerance of the flange surface for the shaft axis

(referred to the centering diameter of the mounting flange)

Motor	Centering diameter mm (in)	Concentricity and axial eccentricity Tolerance N μm
1FL2102	30 (1.18)	60
1FL2.03	50 (1.97)	80
1FL2104	70 (2.76)	
1FL2204		
1FL2105	95 (3.74)	
1FL2205	80 (3.15)	
1FL2304	80 (3.15)	
1FL2306	110 (4.33)	100
1FL2310	114.3 (4.50)	

Test: runout

Test: concentricity

Test: perpendicularity

Technical specifications

Vibration severity and vibration severity grade A according to IEC 60034-14

The vibration severity is the RMS value of the vibration velocity (frequency range from 10 Hz to 2000 Hz). The vibration severity is measured using electrical measuring devices according to DIN 45666.

The specified values refer only to the motor. These values can increase as a result of the overall system vibrational behavior due to installation.

Vibration severity limit values

The speeds of 1800 r/min and 3600 r/min and the associated limit values are specified according to IEC 60034-14.

The speeds of 4500 r/min and 6000 r/min and the specified values are defined by the motor manufacturer.

The motors maintain vibration severity grade A up to the rated speed.

Balancing according to ISO 21940-32

Apart from the balance quality of the motor, the vibrational quality of motors with attached belt pulleys is mainly determined by the balance state of the mounted component. If the motor and the mounted component are balanced separately before being joined, the balancing process of the belt pulley is to be adapted to the motor's balancing type.

SIMOTICS S-1FL2 motors with feather keys are always half-key balanced. In general, motors with a plain shaft are recommended for systems with the most stringent vibrational quality requirements.

Vibration stress, immitted vibration values

The requirements of environmental class 3M8 (according to EN 60721-3-3 Table 6) must be maintained for proper function and safeguard the bearing life. The following limits are valid for (immitted) vibration values introduced into the motor from outside:

- For Low Inertia and Medium Inertia:
 - Vibration velocity V_{rms} according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
 - Vibration acceleration a_{peak} axial and radial 50 m/s² (164 ft/s²)
- For High Inertia:
 - Vibration velocity V_{rms} according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
 - Vibration acceleration a_{peak} axial 25 m/s² (82 ft/s²) and a_{peak} radial 50 m/s² (164 ft/s²)

During transport, the motors withstand single shocks (6 ms) of up to 250 m/s² (820 ft/s²).

Ambient temperature and installation altitude

Operating range without restrictions:

Temperature range from -15 °C to +40 °C (5 °F to 104 °F), installation altitude up to 1000 m (3281 ft).

If deviating conditions are encountered, the S1 characteristic of the motor must be adapted with regard to speed and torque.

Use the following equation to calculate the reduced S1 characteristic:

$$S1_{red}(n) = x_D \times S1_{40\text{ °C } (104\text{ °F}); 1000\text{ m } (3281\text{ ft})} (n/x_D)$$

Installation altitude above sea level m (ft)	Derating factor x_D at an ambient temperature of			
	30 °C (86 °F)	40 °C (104 °F)	45 °C (113 °F)	50 °C (122 °F)
1000 (3281)	1.08	1.00	0.96	0.91
2000 (6562)	1.02	0.93	0.89	0.84
3000 (9843)	0.95	0.86	0.81	0.75
4000 (13124)	0.88	0.77	0.72	0.66
5000 (16405)	0.80	0.68	0.62	0.55

Encoder systems

Singleturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. In contrast to the multiturn absolute encoder, it does not have a revolution counter, and can therefore only supply the position value within one revolution. It does not have a traversing range.

Multiturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. It can also count 4096 revolutions. So with a ball screw, for example, the absolute position of the slide can be determined over a longer distance.

14th position in the Article No. of the motor	Designation
1FL2 ...-...-H..	Absolute encoder 17-bit singleturn (resolution 131072)
1FL2 ...-...-S..	Absolute encoder 21-bit singleturn (resolution 2097152)
1FL2 ...-...-M..	Absolute encoder 21-bit singleturn + 12-bit multiturn (resolution 2097152, traversing range 4096 revolutions)

SIMOTICS S-1FL2 servomotors for SINAMICS S200

Technical specifications

Holding brake

Many drives need a holding brake with an EMERGENCY STOP function for safety reasons or to meet process requirements. The brakes used on SIMOTICS S-1FL2 motors operate on the quiescent current principle. A spring or permanent magnet exerts a tensile force on the brake armature disk, i.e. in a state of zero current, the brake is closed and the motor shaft thereby stopped.

An electric current that flows through a coil generates an opposing field that counteracts the force effect of the spring or permanent magnet and releases or holds open the brake. Only a limited number of braking operations can be performed for an EMERGENCY STOP or power failure without causing excessive wear on the holding brake. The holding brake is not an operational brake. Regular dynamic braking leads to increased wear and premature brake failure. In order to ensure the functionality and specification of the brake, neither the total

operating energy nor the maximum switching energy per braking operation may be exceeded.

The brake control is already fully integrated into the SINAMICS S200 converter system, so that an external circuit is not necessary.

After an EMERGENCY STOP sequence with the maximum single switching energy, a cooling time of at least 3 minutes is required.

The following table contains technical specifications of the holding brakes for operating on SINAMICS S200 converters.

Motor	Shaft height	Holding torque	Dynamic braking torque	Opening time	Closing time	Maximum permissible single switching energy	Total operating energy (service life)	Holding current
		Nm (lbf-ft)	Nm (lbf-ft)	ms	ms	J	kJ	A
1FL2102	20	0.32 (0.24)	0.32 (0.24)	35	10	1	2	< 1

MOTION-CONNECT connection systems

MOTION-CONNECT 350 and 380

Overview

MOTION-CONNECT 350 and 380 connection systems

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

The use of pre-assembled MOTION-CONNECT 350/380 cables ensures high quality and system-tested, problem-free operation.

Degree of protection of pre-assembled power and signal cables is IP65 when closed and connected unless otherwise stated.

MOTION-CONNECT 350/380 cables are not suitable for outdoor use.

MOTION-CONNECT 350/380 cables are approved for a maximum horizontal travel distance of 5 m without support.

The cables must be unwound without twisting.

To maximize the service life of the cable carrier and cables, cables in the carrier made from different materials must be separated in the cable carrier using spacers. The spacers must be filled evenly to ensure that the position of the cables does not change during operation. The cables should be distributed as symmetrically as possible according to their weights and dimensions. Cables with different outer diameters should be separated by spacers as well.

When inserting pre-assembled cables into the cable carrier, do not pull at the connector, as this may damage the strain relief or cable clamping.

The cables must not be fixed in the cable carrier. They must be freely movable.

The cables must be able to be moved without applying force, specifically in the bending radii of the carrier. The specified minimum bending radii must be adhered to.

The cable fixings must be attached at both ends at an appropriate distance from the end points of the moving parts in a dead zone.

Cables must be installed in accordance with the instructions supplied by the cable carrier manufacturer.

In case of vibration load and with horizontal or vertical cable entries, we recommend that the cable is additionally fixed if between the cable strain relief on the cable carrier and the terminal at the motor part of the cable is hanging loose or is not routed. To prevent machine vibrations being transmitted to the connectors, the cable should be fixed at the moving part where the motor is mounted.

Derating factors for power and signal cables

Ambient air temperature °C (°F)	Derating factor according to EN 60204-1 Table D.1
30 (86)	1.10
35 (95)	1.05
40 (104)	1.00
45 (113)	0.96
50 (122)	0.90
55 (131)	0.84
60 (140)	0.78

Characteristic curves

Characteristic curve for MOTION-CONNECT 380

The blue area beneath the characteristic curve represents the potential range of use for the cables. The characteristic curves represent the tested operating points.

Permissible acceleration for MOTION-CONNECT 380 signal and power cables

Overview

Engineering tools

SINAMICS Selector app
Mobile selection guide for frequency converters

Siemens has developed the SINAMICS Selector app as a practical tool for finding article numbers for your SINAMICS converter in the power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220, SINAMICS S200 or SINAMICS S210: The app will provide you with the correct article numbers conveniently. How does it work? Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories. Then you can save your selection and send it by email. The preselection serves as the basis for an order specification with the dealer/Siemens. You will find free downloads for Android and iOS here:
www.siemens.com/sinamics-selector

Cybersecurity information
Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under www.siemens.com/cert

Engineering tools

DriveSim Designer

Overview

DriveSim Designer provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

The models are validated and tested against real SINAMICS converters and are available in the form of a standardized FMU (Functional Mockup Unit). Therefore, they are compatible with various standard time-based simulation programs such as SIMIT, Simcenter Amesim, ANSYS Twin Builder, MATLAB Simulink or Hopsan.

DriveSim Designer is another element in your engineering toolbox. Together with other virtual Siemens solutions, e.g. SIMATIC S7-PLCSIM Advanced or NX Mechatronics Concept Designer, a consistent model-based development process can be implemented.

Benefits

- Speed up time-to-market for OEMs
- Test validated SINAMICS models under real conditions already at the design or planning stage and make needed adjustments
- Identify issues and improvement capabilities early in the design stage and reduce testing effort to save time and cost
- Download the free-of-charge basic version with reduced functionality set, DriveSim Basic, to try the suitability of our solution before buying it
- The full version DriveSim Designer offers a wide range of additional functionalities to improve the SINAMICS simulation model, e. g. safety or position telegrams
- Valid for the most used Siemens drives

Advantages of DriveSim Designer compared to SIMIT PROFIdrive blocks:

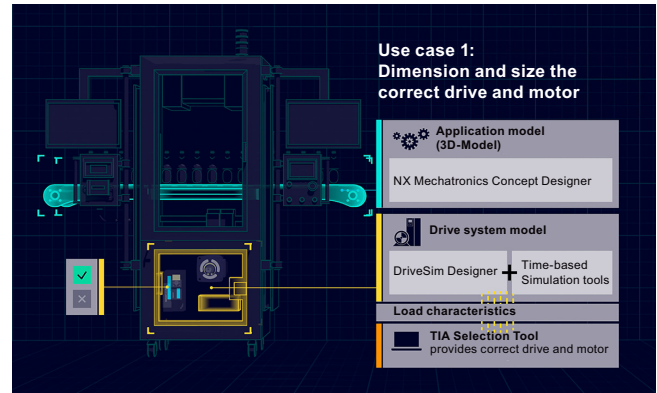

- Increased level of detail due to speed controller, current setpoint filters and internal load model
- Identical parameter values and meaning as in the real SINAMICS device
- Direct reference to SINAMICS documentation
- Basic Safety functions
- Brake control functions for lifting applications
- Validated against the real SINAMICS drive
- No wiring effort to represent functional configurations
- Significant reduction of SIMIT simulation tags (even more is possible if unused in-/ outputs are deselected within the Component Type Editor (CTE))
- Enables simulation of an (internal) two-mass oscillator as application with realistic SINAMICS parameter settings, besides the known limitations by the minimum sample time in SIMIT
- Compatible with every FMU Co-Simulation 2.0 compatible simulation tool

Application

With DriveSim Designer, you can implement three major use cases:

- Providing load characteristics for drive selection and dimensioning
- Virtual commission your PLC already in the design phase
- Test and improve interaction between PLC, drives and application virtually

Use case 1: Dimension and size the correct drive and motor for your application

If you are designing a machine, you want to make sure that you select the SINAMICS converter and SIMOTICS motor most suitable for your drive application. As DriveSim Designer is control-unit-agnostic and thus represents a generic drive, you can parametrize it according to the functionality of your application. Running the simulation results in load characteristics, i.e. torque or speed curves over time. You can import these load profiles into TIA Selection Tool to select the suitable Control Unit and dimension the drive to best fit to the demand. So as a result you have well selected SINAMICS converters and SIMOTICS motors with the help of the digital twin.

Use case 2: Virtual commission your drive and PLC early in the design phase

If you are designing a machine, you want to make sure the PLC code works with your SINAMICS drive. After writing the PLC code in TIA Portal, you can connect it via PLCSIM Advanced to any time-based simulation tool (e.g. SIMIT). Integrated into the simulation tool, DriveSim Designer acts as a realistic communication partner for the PLC. Next, you can commission the virtual PLC in TIA Portal as you would do with a real PLC connected to a real drive. Without simulation, you would need to do that on-site. With simulation, you not only save time, but also have the freedom to try out various configurations and optimize your PLC code early in the process.

Application

Use case 3: Combine the application model and automation model with realistic drive system behavior

With the third Use case, you can connect a simulation tool such as NX Mechatronic Concept Designer to visualize the mechanical movements of your application. This way, you ensure that the drive behaves according to the desired machine performance. You can test several fault scenarios and optimize the interaction between PLC, application and drive virtually so overall, you can avoid unplanned machine behavior and increase the performance of your setup.

Integration

DriveSim Designer can be run in tools that support FMU 2.0 Co-Simulation Import (<https://fmi-standard.org/tools/>).

The FMU has been tested in the following simulation environments and is available in the attached application examples.

Tool	Manufacturer	DriveSim*** variant	PLC Sim Advanced interface	Notes
SIMIT	Siemens	***.fmu	Yes	<ul style="list-style-type: none"> Permissible configuration: ExternalLoad = 1 & . Speed-Controller = 0 or ExternalLoad = 0 & . Speed-Controller = 1 Simulation with external load can provide wrong results because the minimum possible time step is 1 ms
Simcenter Amesim	Siemens	***_double.fmu	Yes	
MATLAB Simulink	MathWorks	< 2019a ***_unstruct.fmu ≥ 2019a ***.fmu	Yes	
ANSYS Twin Builder	ANSYS	***.fmu	No	
Hopsan	Linköping University	***_double.fmu	No	<ul style="list-style-type: none"> Open Source Install "win64-with_compiler-installer.exe" package

Siemens Product Configurator

Overview

The Siemens Product Configurator helps you to configure the optimum drive technology products for a number of applications. The product portfolio comprises the full drive technology range of gearbox, motor, converter and connection system as well as corresponding controller with suitable software license. The intuitive user interface in conjunction with product-specific preliminary selectors makes it simple, fast and efficient to configure products. The result is a bill of materials with extensive documentation consisting of technical data sheets, motor characteristic curves, 2D dimensional drawings / 3D CAD models, EPLAN macros and much more. You can order the products directly by transferring the bill of materials to the shopping cart of SiePortal.

Siemens Product Configurator at a glance

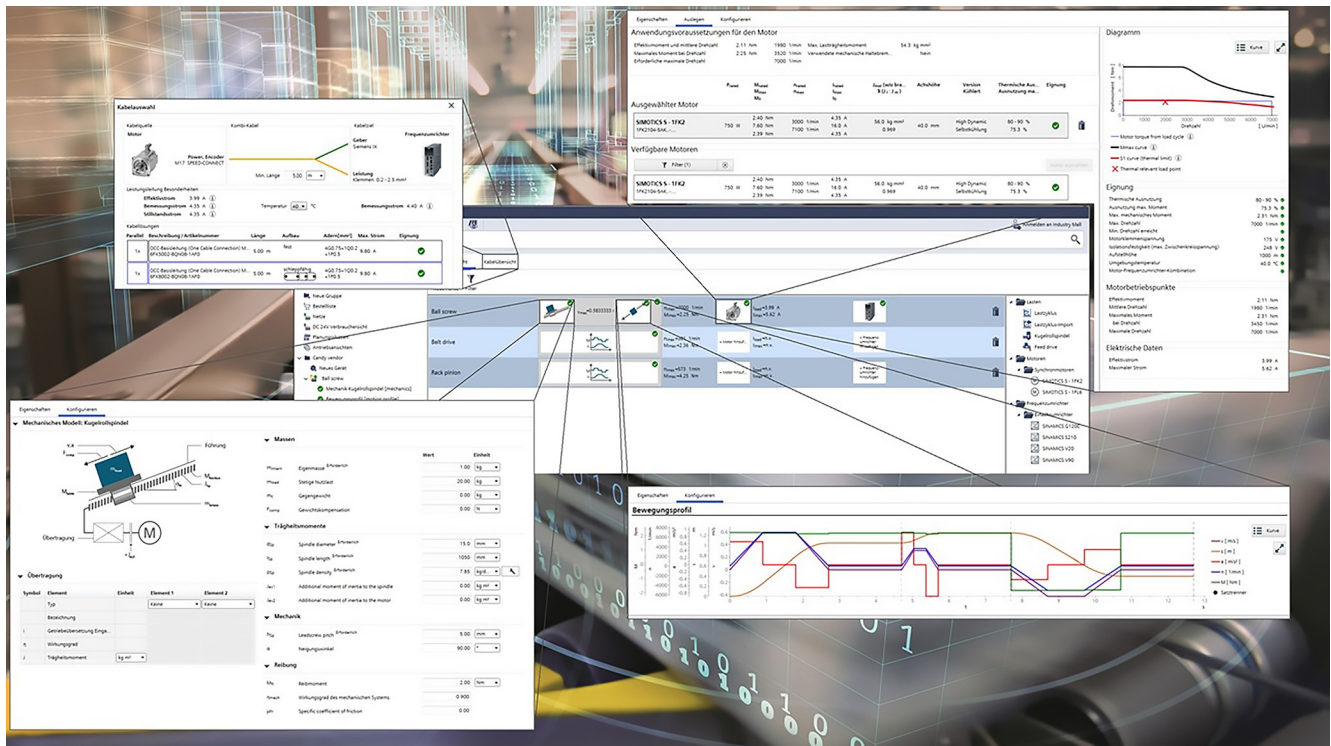

- Quick and easy configuration of drive products and associated components – gearboxes, motors, converters, controllers, connection systems
- Extensive documentation for all products and components, such as
 - Data sheets in up to 12 languages
 - Motor characteristic curves
 - 2D dimensional drawings / 3D CAD models in different formats
 - Terminal box drawing and terminal connection diagram
 - Certificates
 - EPLAN macros
- Ability to order products directly through SiePortal

Access to the Siemens Product Configurator

The Siemens Product Configurator can be accessed without the need for registration or logging in:

www.siemens.com/spc

Overview

Selection guide and configurator for automation technology

Error-free configuration without expert knowledge through intelligent configurators and selection wizards. Desktop and cloud versions enable cross-team collaboration with maximum flexibility.

There are two versions of the TIA Selection Tool:

- One for downloading and execution on Microsoft Windows PCs (from Microsoft Windows 10)
- One for running from the cloud, which is launched from mobile devices directly in the browser (we recommend Safari, Chrome and Firefox)

Projects stored in the cloud can be edited with both tools. This makes it possible to work on-the-go using a tablet, at home on a PC – and vice versa, or together with colleagues and customers.

In order to use the full functionality, we recommended setting up a SiePortal account for both cases. This gives you access to prices and enables you to save your projects to our cloud.

You can find additional information about the TIA Selection Tool at:

www.siemens.com/tia-selection-tool

Drive dimensioning in the TIA Selection Tool

Application-specific requirements can be determined using drive technology dimensioning in the TIA Selection Tool. This can include motors, gearboxes and converters. The tool supports the configuration and dimensioning of control functions with an open and closed control loop. The technical documentation with features of the technical drive system, as well as a product list for ordering via SiePortal can also be compiled.

You can find more information on the SIZER for Siemens Drives engineering tool at

<https://support.industry.siemens.com/cs/ww/en/ps/13434/dl>

SINAMICS web server for SINAMICS S200

Overview

Web server for efficient commissioning, diagnostics, maintenance and operator control and monitoring, any time, from anywhere

Web server for efficient commissioning, diagnostics, maintenance and operator control and monitoring, any time, from anywhere

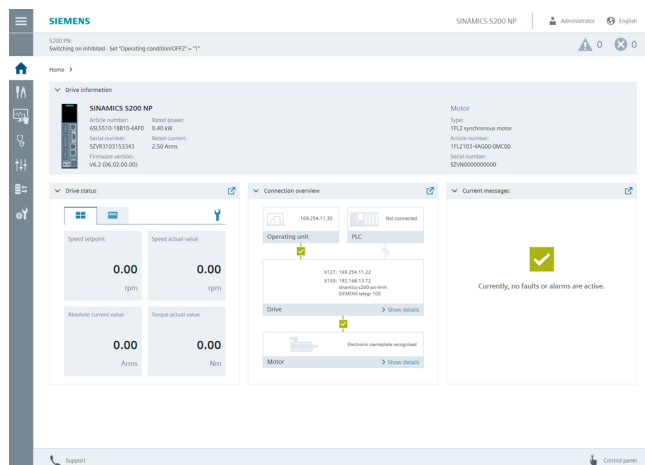

Thanks to the web server, the SINAMICS S200 drive system offers an efficient commissioning, diagnostics, maintenance option as well as operation and monitoring functions. The user is supported by a help function and additional links to specific product information, downloads, FAQs and manuals.

The web server provides access to a multi-faceted range of new options for commissioning or parameter assignment, drive diagnostics, remote maintenance as well as operator control and monitoring for any networked PC with a web browser or for tablets and smartphones (via a separate WLAN access point, such as SINAMICS Smart Adapter).

The following provides an insight into the functionality offered.

The start screen offers a quick overview of the state of the drive

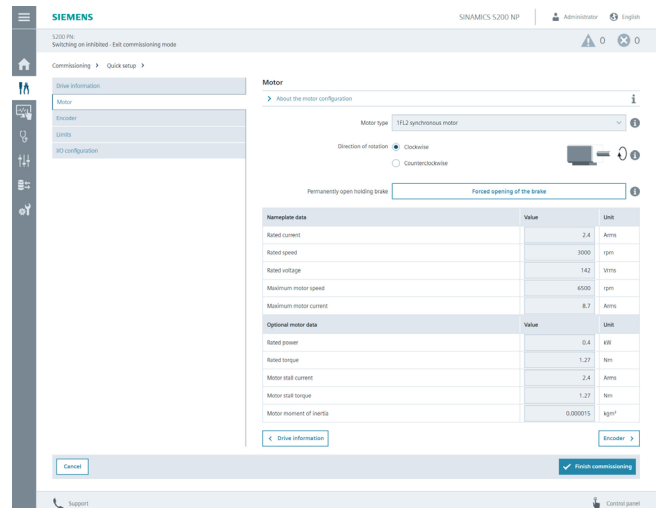

- Drive type, connected motor as well as the article number and installed firmware
- Important drive parameters show the operating state (can be configured)
- The connection overview provides information about the status of the connections (operating unit - converter - motor)
- Overview of all pending fault and warning messages

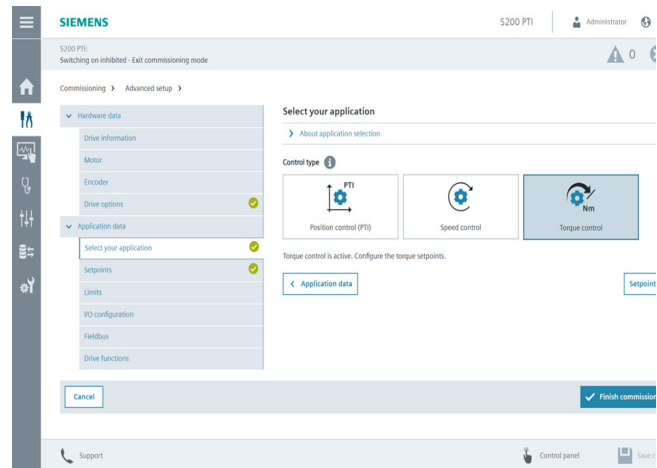

Start screen of the web server integrated into SINAMICS S200

Commissioning

- The quick commissioning provides information about the current motor/encoder and offers the configuration of limit values and digital inputs
- Advanced commissioning defines drive options and functions to suit your application. Advanced commissioning includes all the settings of quick commissioning, as well as additional options and functions.
- Optimization of the drive settings using One Button Tuning (OBT)

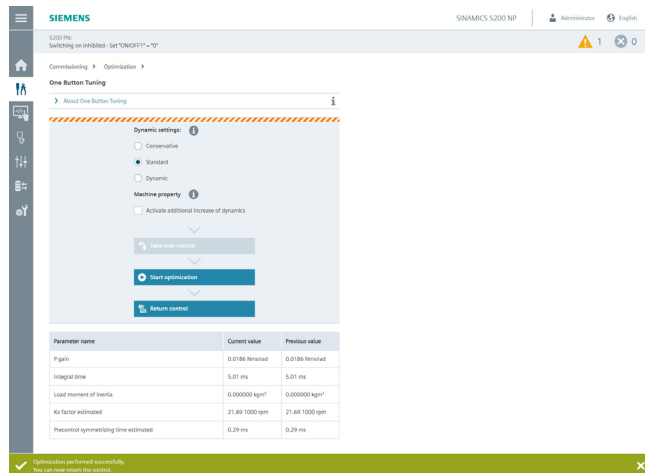

Quick commissioning SINAMICS S200, PROFINET version, with open dialog showing the set motor data

Advanced commissioning of SINAMICS S200, Pulse Train Input version (PTI), with open dialog for application selection

SINAMICS web server for SINAMICS S200

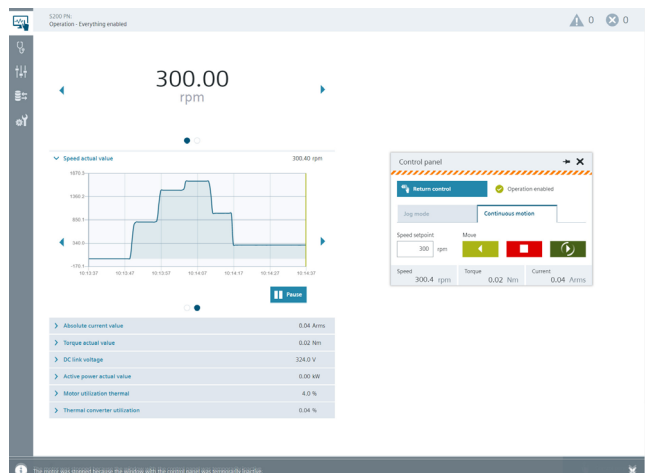

Overview

One Button Tuning (OBT)

Operator control and monitoring

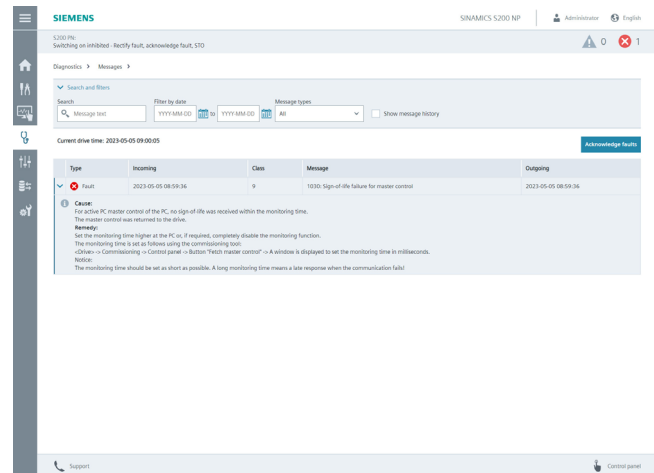

- Configurable drive status with value or trend display
- Status of the digital inputs
- Drive traversing via the control panel, which can be freely positioned on the screen

Operator control and monitoring of the drive with the help of the drive status and control panel

Diagnostics

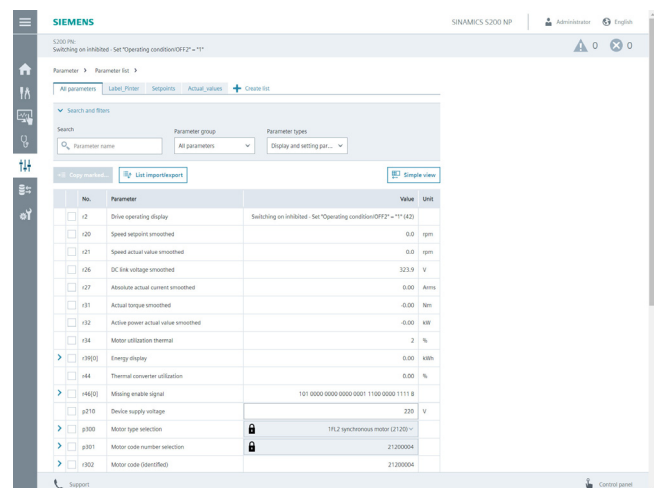

- Evaluation of warnings and fault messages
- Evaluation of system events (diagnostic buffer)
- Analysis of the safety status
- Connection overview, diagnostics of the drive communication and control and status words

Alarm view with convenient search and filter functions

Service and maintenance functions

- Monitor and adjust drive parameters
- Create, import and export user-specific parameter lists
- Back up and restore the drive configuration
- Perform firmware update, also via the network
- Manage software licenses
- Configure basic settings for the drive and web server (e.g. date and time of the drive)
- Configure and manage user accounts and access controls (UMAC)

Parameter list for quick access to drive parameters, also via user-defined parameter lists

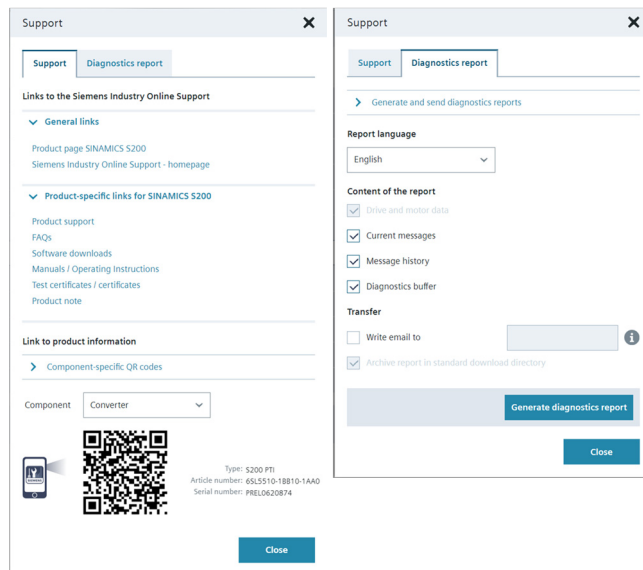

Engineering tools

SINAMICS web server for SINAMICS S200

Overview

Support

- Operator support with comprehensive information about the drive and user interface
- Easy access to product information such as FAQs, software downloads, manuals and certificates
- When storing the html documentation on the drive memory card, the user manual can be accessed in a context-sensitive manner from the user interface
- The diagnostics report supports the support with basic information on the current status of the converter, e.g. in the event of a malfunction or error. The diagnostics report always contains the drive, motor and encoder data and, optionally, an overview of the errors and messages that have occurred.

Support dialog for quick access to product-specific information

Benefits

Simple and fast commissioning

- Installation of additional commissioning software is not required.
- Tools required for the commissioning are ready to use via the integrated web server.
- Standard pages to set thresholds and onboard inputs
- Simple controller optimization with One Button Tuning (OBT)
- Extensive online help with context-sensitive access to the Operating Instructions (memory card required)

Shorter machine downtimes

- Quick overview of the current configuration and the state of the drive
- Efficient diagnostics and maintenance
- Understandable diagnostic information and messages, including the causes of issues and possible remedies, are displayed in plain text in multiple languages
- Context-sensitive help with optional access to the web-based device documentation provides quick help with questions about drive functions

Convenient service and maintenance functions

- Quick backup and restoration of the drive data
- Convenient firmware update, also via the network
- Convenient access to drive parameters
- User-defined parameter lists that focus on what matters
- Easy and efficient handling of the parameter list by using search functions and filters (e.g. parameter groups, parameter types)
- Easy exchange with operating personnel by importing/exporting user-defined parameter lists.
- User-defined parameter lists can be exchanged between the SINAMICS Startdrive and the web server.
- The generation and dispatch of a diagnostics report supports communication with service personnel or machine builders.

Direct language selection

- English, French, German, Italian, Spanish, Chinese Simplified

Accessibility

- Via all LAN or PROFINET interfaces
- Use of mobile devices (e.g. notebooks/tablets and smartphones) via WLAN e.g. with SINAMICS Smart Adapter or a separate access point
- Access to the web server via PCs/notebooks, SIMATIC HMI (> 10"), smartphones/tablets with a Chromium-based internet browser

Access security

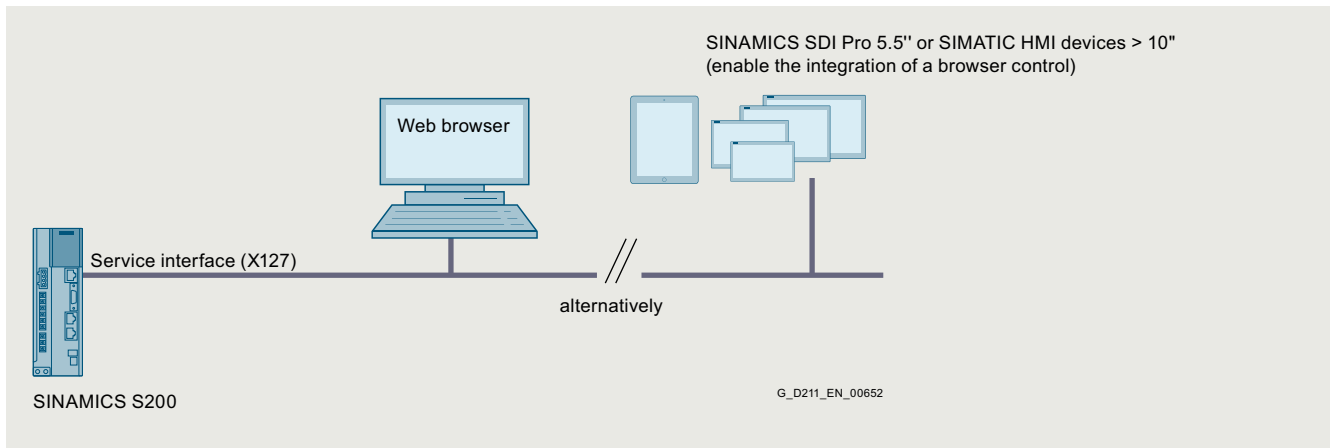

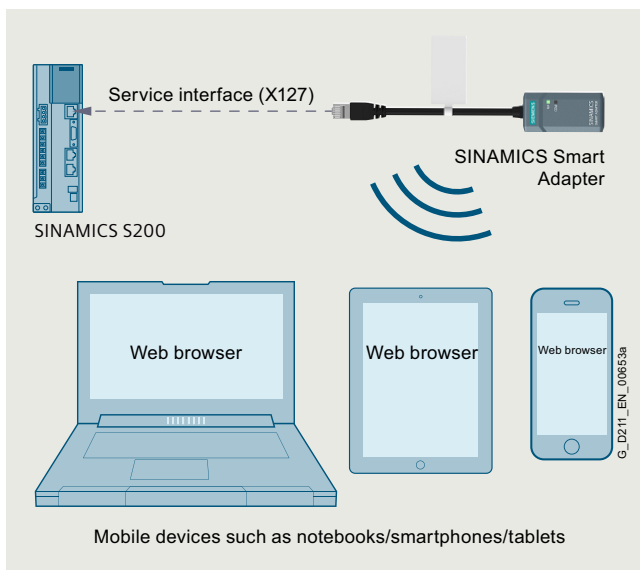

- Protection against unauthorized access to the drive functions and data
- Convenient user administration that supports a roles concept
- Easy set-up and management of user accounts

Application

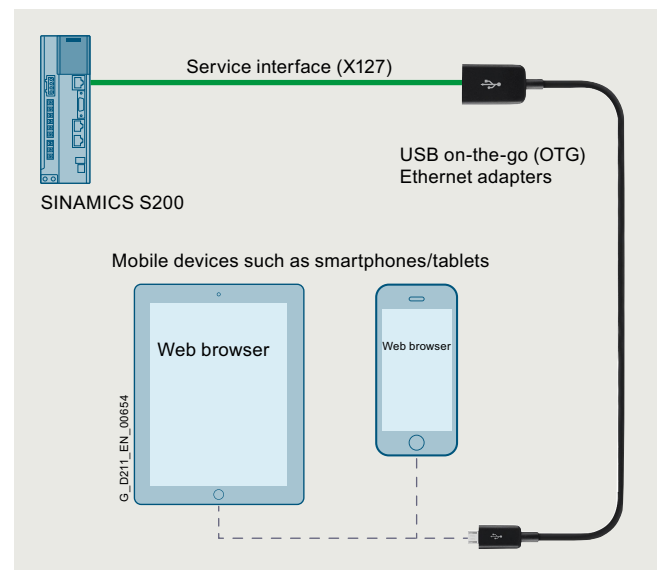

The web server is ideal for applications not requiring any special commissioning software or version dependencies. Commissioning, diagnostics and maintenance as well as operator control and monitoring are possible both locally and remotely, provided appropriate security measures are applied.

SINAMICS web server for SINAMICS S200

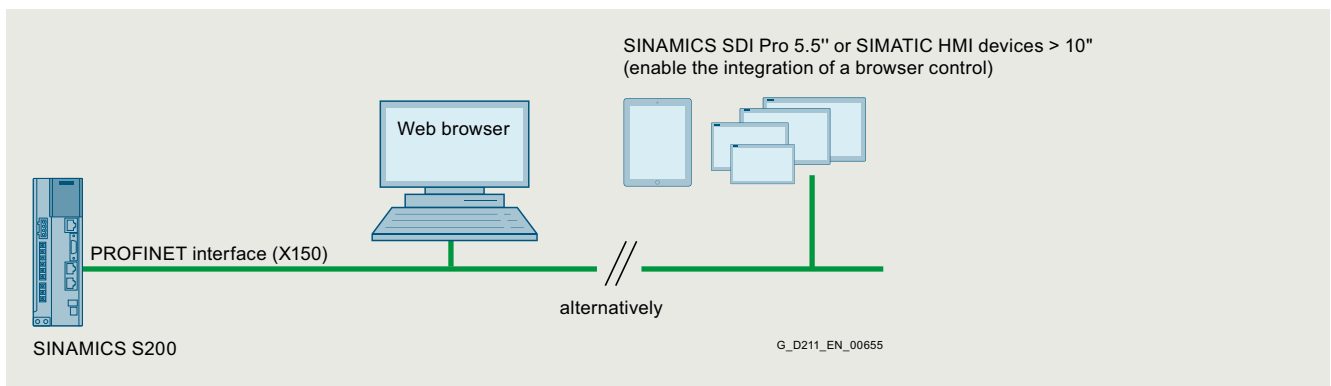

Integration

Integration of the SINAMICS web server based on the example of a SINAMICS S200 and the service interface (X127) ¹⁾

Wireless access to the web server via the service interface (X127) of the SINAMICS S200 with the help of the SINAMICS Smart Adapter

Access to the web server via the service interface (X127) of the SINAMICS S200 with the help of a USB on-the-go (OTG) Ethernet adapter

Integration of the SINAMICS web server based on the example of a SINAMICS S200 and the PROFINET interface (X150) as connected web client (e.g. PC, SIMATIC HMI etc.) ¹⁾¹⁾ SINAMICS SDI Pro 5.5" available soon.

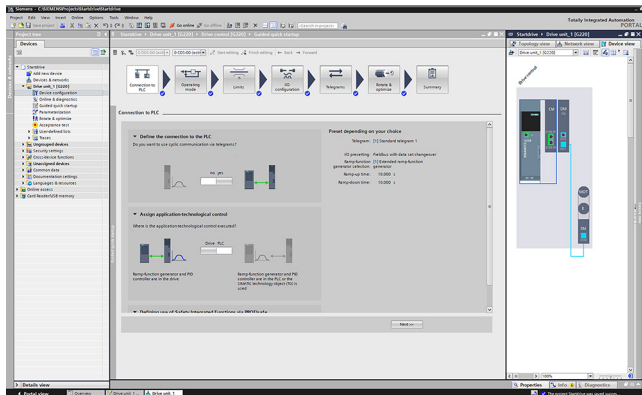

Engineering tools

SINAMICS Startdrive commissioning tool

Overview

SINAMICS Startdrive is integrated in the TIA Portal and is a tool for the configuration, commissioning and diagnostics of the SINAMICS family of converters.

The SINAMICS Startdrive commissioning tool has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. Time-saving and guided step-by-step commissioning with maximum flexibility is complemented by user-friendly graphic function views for all drive functions, including functional safety (Safety Integrated) and drive-based technology functions (e.g. EPOS). The automatic message display, the powerful real-time trace and the context-sensitive online help make converter diagnostics very easy.

The software packages based on the TIA Portal are harmonized with each other and offer important benefits, the main advantage being a shared project storage. The TIA Portal enables simple integration of SINAMICS converters in your automation solution. Thanks to the standardization of operator actions and the integration in general TIA Portal operating concepts (e.g. UMAC, Openness) as well as standard TIA Portal functions (e.g. Undo/Redo), familiarization is easy both for drive experts as well as SIMATIC users. Special focus is placed on the interaction between SIMATIC and SINAMICS, especially when connecting the SINAMICS drives to SIMATIC technology objects.

Integration

Supported frequency converters

SINAMICS Startdrive Basic enables complete commissioning, diagnostics, parameterization, optimization and connection to the PLC for the following SINAMICS converters integrated in SINAMICS Startdrive:

- SINAMICS G120, G120C, G120D, G120P
- SINAMICS G115D
- SINAMICS G130, G150
- SINAMICS G220 (as of V18 SP2 Update 1)
- SINAMICS S120 ¹⁾, S150
- SINAMICS S210 and SINAMICS S210 (New) (as of V18 SP1)
- SINAMICS S200 (as of V18 SP2)
- SINAMICS MV

¹⁾ Including SINAMICS S220 Smart Line Modules in booksize format as of SINAMICS Startdrive V17 Update 1.

SINAMICS Startdrive Advanced

With SINAMICS Startdrive Advanced (available as of V15) you benefit from powerful engineering functions that save you considerable time and ultimately costs.

- Safety acceptance test:
 - Guided acceptance test wizard for all drive-based Safety Integrated functions
 - Automatic and safety function-specific generation of traces to analyze the machine behavior
 - Generation of an acceptance report as Excel file (xlsx format, can also be used with OpenOffice)
 - Safety Activation Test
- Improved optimization options in the drive: Extended measuring functions (available for CU320-2 PN/DP and CU310-2 PN as of V5.2 SP3, SINAMICS S210 (New) as of V6.1 and SINAMICS S200 as of V6.2), long-term trace
- Also contains all Startdrive Basic functions
- Only license key required, no additional installation

New in V19

Startdrive Basic V19

- Support of the shared device functionality for SINAMICS S210, S120, G220 for separate control of the drives by separate controllers
- Improvement of the library function for individual drive objects in the multi-axis system
- Integration of the decentralised SINAMICS S120M drives
- Integration of the drive version V6.3 for SINAMICS S200 and SINAMICS S210 (New):
 - Introduction of the positioning function EPOS for SINAMICS S210 (New)

Startdrive Advanced V19

- Long-term trace functionality for CU320-2 PN/DP and CU310-2 PN-based drive units

SINAMICS Startdrive commissioning tool

Integration

Installation versions

SINAMICS Startdrive can be installed as an optional package to SIMATIC STEP 7 or as a stand-alone application (without SIMATIC STEP 7).

System requirements

The following table shows the recommended hardware and system equipment for the operation of SINAMICS Startdrive.

Hardware	Recommendation
Computer	As of SIMATIC FIELD PG M6 Comfort (or comparable PC)
Processor	Intel Core i5-8400H (2.5 ... 4.2 GHz; 4 cores + hyper-threading; 8 MB Smart Cache)
RAM	16 GB or more (32 GB for large projects)
Hard disk	SSD with at least 50 GB available memory
Screen resolution	15.6" Full HD display (1920 × 1080 or larger)
Operating systems	<ul style="list-style-type: none"> • Microsoft Windows 10 (64 bit) <ul style="list-style-type: none"> - Windows 10 Professional Version 22H2 - Windows 10 Enterprise 21H2, 22H2 - Windows 10 Enterprise 2016 LTSC - Windows 10 Enterprise 2019 LTSC - Windows 10 Enterprise 2021 LTSC • Microsoft Windows 11 (64 bit) <ul style="list-style-type: none"> - Windows 11 Home Version 21H2, 22H2 - Windows 11 Professional Version 21H2, 22H2 - Windows 11 Enterprise 21H2, 22H2 • Microsoft Windows Server (64 bit) <ul style="list-style-type: none"> - Windows Server 2016 Standard (full installation) - Windows Server 2019 Standard (full installation) - Windows Server 2022 Standard (full installation)

Compatibility with other products

- SINAMICS Startdrive V19 operates with STEP 7, WinCC and Scout TIA V19 in one framework
- SINAMICS Startdrive V19 can be installed on the same computer in parallel with other versions of SINAMICS Startdrive V12 to V18
- SINAMICS Startdrive can be installed on the same computer as SINAMICS MICROMASTER STARTER

Supported virtualization platforms

SINAMICS Startdrive can be installed in a virtual machine. For this purpose, one of the following virtualization platforms in the specified version or a newer version can be used:

- VMware vSphere Hypervisor (ESXi) 6.7
- VMware Workstation 15.5.0
- VMware Player 15.5.0
- Microsoft Hyper-V Server 2019

Supported safety programs

The following safety programs have been tested with SINAMICS Startdrive V19:

- Virus scanners:
 - Symantec Endpoint Protection 14.6
 - Trend Micro OfficeScan 14.0
 - McAfee Endpoint Security (ENS) 10.6 and 10.7
 - Microsoft Defender
 - Qihoo 360 "Safe Guard 12.1" + "Virus Scanner"
- Encryption software:
 - Microsoft Bitlocker
- Host-based Intrusion Detection System
 - McAfee Application Control 8.3.3

- location search or free text search.

Overview

Keep your business running and shaping your digital future – with Industry Services

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt. Of course, we take care that your production is protected against cyber threats. We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need – safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

www.siemens.com/digital-enterprise-services

Services and documentation

Industry Services

Industry Services – Portfolio overview

Overview

Digital Industry Services

Digital Industry Services make your industrial processes transparent to gain improvements in productivity, asset availability, and energy efficiency.

Production data is generated, filtered and translated with intelligent analytics to enhance decision-making.

This is done whilst taking data security into consideration and with continuous protection against cyber-attack threats.

www.siemens.com/digital-enterprise-services

Training Services

From the basics and advanced to specialist skills, SITRAIN courses provide expertise right from the manufacturer – and encompass the entire spectrum of Siemens products and systems for the industry.

Worldwide, SITRAIN courses are available wherever you need a training course in more than 170 locations in over 60 countries.

<https://support.industry.siemens.com/cs/ww/en/sc/2226>

Support and Consulting Services

Industry Online Support site for comprehensive information, application examples, FAQs and support requests.

Technical and Engineering Support for advice and answers for all inquiries about functionality, handling, and fault clearance.

The Service Card as prepaid support for value added services such as Priority Call Back or Extended Support offers the clear advantage of quick and easy purchasing.

Information & Consulting Services, e.g. SIMATIC System Audit; clarity about the state and service capability of your automation system or Lifecycle Information Services; transparency on the lifecycle of the products in your plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2235>

Spare Parts

Spare Parts Services are available worldwide for smooth and fast supply of spare parts – and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order management.

Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains – including risk consulting.

Asset Optimization Services help you design a strategy for parts supply where your investment and carrying costs are reduced and the risk of obsolescence is avoided.

<https://support.industry.siemens.com/cs/ww/en/sc/2110>

Repair Services

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality.

Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

<https://support.industry.siemens.com/cs/ww/en/sc/2154>

Field and Maintenance Services

Siemens specialists are available globally to provide expert field and maintenance services, including commissioning, functional testing, preventive maintenance and fault clearance.

All services can be included in customized service agreements with defined reaction times or fixed maintenance intervals.

<https://support.industry.siemens.com/cs/ww/en/sc/2265>

Retrofit and Modernization Services

Provide a cost-effective solution for the expansion of entire plants, optimization of systems or upgrading existing products to the latest technology and software, e.g. migration services for automation systems.

Service experts support projects from planning through commissioning and, if desired over the entire extended lifespan, e.g. Retrofit for Integrated Drive Systems for an extended lifetime of your machines and plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2286>

Service Programs and Agreements

A technical Service Program or Agreement enables you to easily bundle a wide range of services into a single annual or multi-year agreement.

You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities.

Programs and agreements can be customized as KPI-based and/or performance-based contracts.

Online Support for Siemens Industry Products

Siemens Industry and Online Support with some 1.7 million visitors per month is one of the most popular web services provided by Siemens. It is the central access point for comprehensive technical know-how about products, systems and services for automation and drives applications as well as for process industries.

In connection with the challenges and opportunities related to digitalization you can look forward to continued support with innovative offerings.

Services and documentation

Training

SITRAIN – Digital Industry Academy

Introduction

Lern the way you like it – with SITRAIN

SITRAIN imparts a wide range of technical knowledge for all industries and applications. Our offering is oriented toward the needs of learners and the demands of innovative companies. Get pleasure out of learning - thanks to innovative learning methods, personal support, and knowledge that will help you in your work and further development. For successful, flexible, and continuous learning.

Education and training directly from the manufacturer

SITRAIN provides you with training from the industrial product and solution portfolio from Siemens and benefits from 30 years of expertise in technical training. Take a look at the many options for expanding your knowledge with SITRAIN and find the course that meets your needs! The following training and further education units are available to you for your individual knowledge building:

Industrial Automation Systems SIMATIC

Training available for:
SIMATIC S7-1500, TIA Portal,
SIMATIC S7-300/400,
SIMATIC S7-1200

Drive Technology

Training available for:
SINAMICS S120 and
SINAMICS G120 low-voltage
converters,
SINAMICS G130 / G150 /
G180 / S150

SINUMERIK CNC automation system

Training available for:
SINUMERIK 840D, SINUMERIK
840D sl and SINUMERIK ONE

Process Control Systems

Training available for:
SIMATIC PCS 7,
SIMATIC PCS neo

Digital Enterprise

Training available for:
Openness, SIMIT, OPC UA,
Industrial Edge,
Virtual commissioning

Industrial Communications

Training available for:
PROFINET, SCALANCE,
RUGGEDCOM, Industrial Ethernet,
Fieldbus communication,
Industrial Security,
Remote
communication

Identification and Locating

Training available for:
RFID, RTLS-Systems

Operator Control and Monitoring Systems

Training available for:
SIMATIC WinCC Unified in TIA
Portal, SIMATIC WinCC in TIA
Portal, SIMATIC WinCC V7x

Motion Control System SIMOTION

Training available for:
SIMOTION (Programming,
Commissioning, Diagnostics,
Service)

Smart Infrastructure

Training available for:
SIRIUS, SENTRON, SIVACON,
ALPHA, SIMOCODE,
Circuit breakers

Process Analytics & Instrumentation

Training is available for process
analytics and instrumentation,
explosion protection, process
gas chromatographs

Additional training offer

SIMOVE with Automated
Guided Vehicles (AGV),
SIPLUS CMS, Guidelines and
standards for control cabinets

Introduction***Different learning formats and methods for maximum learning success***

With our SITRAIN training formats, you learn in the way that best suits your preferences and routine. You decide whether you would rather take online training or face-to-face training. It is up to you whether you would like to study on demand or at fixed times.

With a personal learning consultant, in the team, or on your own – you can explore all the possibilities.

Discover our three learning formats:

**Learning Event**

SITRAIN Learning Events are the perfect choice when you want to achieve a defined learning goal in the shortest possible time. You learn in a protected learning environment outside of the daily work routine under the guidance of a learning consultant – virtually, in the training center, or at your company.

**Learning Membership
SITRAIN Access**

With SITRAIN access, you enter a world of extensive and constantly expanding self-study units on our digital learning platform for industry. With SITRAIN access, you can implement a modern learning culture in your team or company with independent and continuous learning.

**Learning Journey**

The Learning Journey is the perfect combination of units taken live and self-study units for sustainable learning success. The modular approach enables simple integration into your daily work. This also includes one-year membership for using the SITRAIN access digital learning platform.

**Live**

Learn together with others, simultaneously and guided by a learning consultant. Online, in the SITRAIN training center or at your company.

**Self-reliant**

Expand your knowledge self-determined with industry learning and work on your learning units at your own pace and according to your own schedule.

**On demand**

Get the knowledge you need, exactly when you need it. Be it to answer a current question or to work on a special topic.

**Individuell**

Talk directly with the learning consultant, clarify detailed questions and get personal coaching for transferring the learned topics to your own application.

**Training cases catalog**

SINAMICS S200 training case

Overview

Example: SINAMICS S200 training case PROFINET version

Selection and ordering data

Description	Article No.
SINAMICS S200 training case PROFINET version Scope of delivery: <ul style="list-style-type: none">• 2 × SINAMICS S200 servo converter, PROFINET version, 200 V, 100 W• 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn• 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn• 2 × Pre-assembled dual motor connection cable• Rail, prepared for installation of a controller, e.g. SIMATIC S7-1500 (controller not included in scope of delivery)• SIMATIC ET 200SP, PROFINET Interface Module The SINAMICS S200 training case PROFINET version is supplied as a trolley with a hood.	6AG1067-1AA42-0AA0
SINAMICS S200 training case Pulse Train Input version (PTI) (available soon) Scope of delivery: <ul style="list-style-type: none">• 1 × SINAMICS S200 servo converter, Pulse Train Input version (PTI), 200 V, 100 W• 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn• 1 × Pre-assembled dual motor connection cable• 1 × SIMATIC S7-1200, compact CPU, CPU 1211C, DC/DC/DC• 1 × SIMATIC S7-1200, Communication Board CB 1241, RS485 The SINAMICS S200 training case Pulse Train Input version (PTI) is supplied as a trolley with a hood.	6AG1067-1AA43-0AA0

Overview

Our understanding of an application is the customer-specific solution of an automation task based on standard hardware and software components. In this respect, industry knowledge and technological expertise are just as important as expert knowledge about how our products and systems work. We are setting ourselves this challenge with more than 280 application engineers in 20 countries.

Application centers

We currently have application centers in:

- Germany: Head Office in Erlangen and in other German regions, e.g. in Munich, Nuremberg, Stuttgart, Mannheim, Frankfurt, Chemnitz, Cologne, Bielefeld, Bremen, Hanover, Hamburg
- Belgium: Brussels
- Brazil: Sao Paulo
- China: Beijing and 12 regions
- Denmark: Ballerup
- France: Paris
- Great Britain: Manchester
- India: Mumbai
- Italy: Bologna, Milan
- Japan: Tokyo, Osaka
- The Netherlands: The Hague
- Austria: Vienna
- Poland: Warsaw
- Sweden: Göteborg
- Switzerland: Zurich, Lausanne
- Spain: Madrid
- South Korea: Seoul
- Taiwan: Taipei
- Turkey: Istanbul
- USA: Atlanta

These application centers specialize in the use of SIMATIC/SIMOTION/SINAMICS. You therefore can rely on automation and drive specialists for implementing successful applications. By involving your personnel at an early stage in the process, we can provide a solid basis for rapid knowledge transfer, maintenance and further development of your automation solution.

Advice on applications and implementation

We offer a variety of consultation services to help you find the optimum solution for the SIMATIC/SIMOTION/SINAMICS application you want to implement:

The quotation phase includes

- clarification of technical questions,
- discussion of machine concepts and customer-specific solutions,
- selection of suitable technology and
- suggestions for implementation.

A technical feasibility study is also performed at the outset. In this way, difficult points of the application can be identified and solved early on. We can also configure and implement your application as a complete solution from a single source.

A large number of proven standard applications are available for use during the implementation phase. This saves engineering costs.

The system can be commissioned by experienced, competent personnel, if required. This saves time and trouble.

If servicing is required, we can support you on site or remotely. For further information about servicing, please see the section "Industry Services".

On-site application training

Training for the implemented applications can also be organized and carried out on site. This training for machine manufacturers and their customers does not deal with individual products, but the entire hardware and software system (for example, automation, drives and visualization).

From an initial concept to successful installation and commissioning: We provide complete support for SIMATIC/SIMOTION/SINAMICS! Contact your Siemens representative.

You can find further information at www.siemens.com/machinebuilding

Services and documentation

mySupport documentation

Overview

mySupport documentation – Compiling personal documents

mySupport documentation is a web-based system for generating personalized documentation based on standard documents and is part of the Siemens Industry Online Support portal.

In mySupport, a personal document library can be created in the "Documentation" category. This library can be accessed online in mySupport or also be generated in various formats for offline use.

Previously, this functionality was available in the My Documentation Manager for configurable manuals. Due to the integration in mySupport, all entries of the Industry Online Support can now be imported into the personal document library, including FAQs or product notifications.

If you have already worked with the My Documentation Manager, all of the previously created libraries will continue to be available without restrictions in mySupport.

In addition, the personal library in mySupport can be shared with other mySupport users. In this way, a collection of relevant documents can be created very effectively and used together with other mySupport users all over the world.

You must register/log in for configuring and generating/managing.

Benefits

- Display
View, print or download standard documents or personalized documents
- Configure
Transfer standard documents or parts of them to personalized documents
- Generate/Manage
Generate and manage personalized documents in the formats PDF, RTF or XML in all available languages

Function

Opening mySupport documentation in the Industry Online Support portal

- Via the product support, entry type "Manual":
<https://support.industry.siemens.com/cs/ww/en/ps/manual>
By clicking on the required version of the manual and then "Show and configure", the manual opens in a modular view, where you can navigate from topic to topic. Here the direct link to a topic can be used and made available to other users. The selected document can be added to the personal library via "mySupport Cockpit" > "Add to mySupport documentation".
- Via the direct link
<https://support.industry.siemens.com/my/ww/en/documentation/advanced>
After logon/registration, the online help is displayed as the current document.

More information

You can find additional information on the internet at

- <https://support.industry.siemens.com/my/ww/en/documentation>
- https://support.industry.siemens.com/cs/helpcenter/en/index.htm?#persoenliche_bibliothek_aufbauen.htm

Overview

A high-quality programmable control or drive system can be used to maximum effect only if the user is aware of the performance of the products used as a result of intensive training and good technical documentation.

This is becoming more important due to the shorter innovation cycles of modern automation products and the convergence of electronics and mechanical engineering.

A comprehensive range of documentation is available which includes a Getting Started guide, operating instructions, installation manuals and a list manual.

In addition to technical information for SINUMERIK, SINAMICS, SIMOTION and SIMOTICS, the documentation is available for downloading as a PDF file from the internet:

- SINUMERIK
<https://support.industry.siemens.com/cs/document/108464614>
- SINAMICS
<https://support.industry.siemens.com/cs/document/109807358>
- SIMOTION
<https://support.industry.siemens.com/cs/document/109479653>
- SIMOTICS
<https://support.industry.siemens.com/cs/document/109813641>

Application

Explanations of the manuals:

- **Operating Instructions**
contain all the information needed to install the device and make electrical connections, information about commissioning and a description of the converter functions.
Phases of use: Control cabinet construction, commissioning, operation, maintenance and servicing.
- **Hardware Installation Manual**
contains all relevant information about the intended use of the components of a system (technical specifications, interfaces, dimensional drawings, characteristics, or possible applications), information about installation and electrical connections and information about maintenance and servicing.
Phases of use: Control cabinet configuration/construction, maintenance and servicing.
- **Operating and Installation Instructions**
(for converter and accessories)
contain all relevant information about the intended use of the components, such as technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.
Phases of use: Control cabinet configuration/construction.
- **Manual/Configuration Manual**
contains all necessary information about the intended use of the components of a system, e.g. technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.
Phases of use: Cabinet configuration/setup, circuit diagram configuration/drawing.
- **Commissioning Manual**
contains all information relevant to commissioning after installation and wiring. It also contains all safety and warning notices relevant to commissioning in addition to overview drawings.
Phases of use: Commissioning of components that have already been connected, configuration of system functions.
- **List Manual**
contains all parameters, function diagrams, and faults/alarms for the product/system as well as their meanings and setting options. It contains parameter data and fault/alarm descriptions with functional correlations.
Phases of use: Commissioning of components that have already been connected, configuration of system functions, fault cause/diagnosis.
- **Getting Started**
provides information about getting started for the first-time user as well as references to additional information. It contains information about the basic steps to be taken during commissioning. The information in the other documentation should be carefully observed for all of the other work required.
Phases of use: Commissioning of components that have already been connected.
- **Function Manual Drive Functions**
contains all the relevant information about individual drive functions: Description, commissioning and integration in the drive system.
Phases of use: Commissioning of components that have already been connected, configuration of system functions.

SINAMICS S200 documentation

Overview

Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:

www.siemens.com/sinamics-s200/documentation

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

www.siemens.com/sinamics-s200

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

www.siemens.com/sinamics-s200/configuration

7/11	Conditions of sale and delivery

Appendix

Certificates of suitability

Overview

Many of the products in this Catalog fulfill requirements, e.g. for UL, CSA or FM and are labeled with the corresponding approval designation.

All of the certificates of suitability, approvals, certificates, declarations of conformity, test certificates, e.g. CE, UL, Safety Integrated etc. have been performed with the associated system components as they are described in the Catalogs and Configuration Manuals.

The certificates are only valid if the products are used with the described system components, are installed according to the Installation Guidelines and used for their intended purpose.

In other cases, the vendor of these products is responsible for arranging for the issue of new certificates.

More information about certificates can be found online at:
<https://support.industry.siemens.com/cs/ww/en/ps/cert>

Appendix

Software licenses

Overview

Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing.

Data generated with engineering software and executable programs can be duplicated for your own use or for use by third parties free-of-charge.

Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.

The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge.

You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.

Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of supply can be found in the readme file supplied with the relevant product(s).

License types

Siemens Digital Industries and Smart Infrastructure offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. A license is required for each concurrent user.

Single license

Unlike the floating license, a single license permits only one installation of the software per license.

The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc.

One single license is required for each type of use defined.

Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive).

One license is required for each installation of the software.

Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

Delivery versions

Software is constantly being updated.

The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

Overview

ServicePack

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

License key

Siemens Digital Industries and Smart Infrastructure supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

Software Update Service (SUS)

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf

Metal surcharges

Explanation of the raw material/metal surcharges ¹⁾

Surcharge calculation

To compensate for variations in the price of the raw materials silver, copper, aluminum, lead, gold, dysprosium²⁾ and/or neodym²⁾, surcharges are calculated on a daily basis using the so-called metal factor. These apply to products containing these raw materials and are calculated per raw material. These surcharges are added to the price of a product if the basic official price (BOP) of the raw material in question is exceeded. Surcharges are calculated in accordance with the following criteria:

Basic official price (BOP) of the raw material

- BOP of the workday prior to receipt of the order or prior to release order (Daily Price) for:
 - Silver (processed)³⁾
 - Gold (processed)³⁾
 - Aluminum (temporary constant 360.31 EUR per 100 kg, due to loss of DEL-Notiz)
 - Lead (constant 199.50 EUR per 100 kg)
- BOP of two workdays prior to receipt of the order or prior to release order (Daily Price) per 100 kg for:
 - Copper (LME-notation/10, converted from USD to EUR using LME-FX-Rate [MTLE] + 1.2%) + 1%⁴⁾
- If BOP is suspended, the last one is used.

Metal factor of the products

Certain products are displayed with a metal factor. The metal factor determines the official price (for those raw materials concerned) as of which the metal surcharges are applied and the calculation method used (weight or percentage method). An exact explanation is given below.

Structure of the metal factor

Metal factor consists of several digits; the first digit indicates whether the percentage method of calculation refers to the list price or a discounted price (customer net price) (L = list price / N = customer net price).

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG)
3rd digit	for copper (CU)
4th digit	for aluminum (AL)
5th digit	for lead (PB)
6th digit	for gold (AU)
7th digit	for dysprosium (Dy) ²⁾
8th digit	for neodym (Nd) ²⁾

Weight method

The weight method uses the BOP, the daily price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the daily price. The difference is then multiplied by the raw material weight.

The BOP can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. The raw material weight can be found in the respective product descriptions.

Percentage method

Use of the percentage method is indicated by the letters A-Z at the respective digit of the metal factor.

The surcharge is increased - dependent on the deviation of the daily price compared with the BOP - using the percentage method in "steps" and consequently offers surcharges that remain constant within the framework of this "step range". A higher percentage rate is charged for each new step. The respective percentage level can be found in the table below.

Metal factor examples

L E A - - - -	Basis for % surcharge: List price Silver Basis 150 €, Step 50 €, 0.5 % Copper Basis 150 €, Step 50 €, 0.1 % No surcharge for aluminum No surcharge for lead No surcharge for gold No surcharge for dysprosium No surcharge for neodym

Explanation of the raw material/metal surcharges for dysprosium and neodym (rare earths)

Surcharge calculation

To compensate for variations in the price of the raw materials silver ¹⁾, copper ¹⁾, aluminum ¹⁾, lead ¹⁾, gold ¹⁾, dysprosium and/or neodym, surcharges are calculated on a daily basis using the so-called metal factor. This applies to products containing at least one of these raw materials. The surcharge for dysprosium and neodym is calculated as a supplement to the price of a product if the basic official price (BOP) of the raw material in question is exceeded.

The surcharge is calculated in accordance with the following criteria:

- Basic official price (BOP) of the raw material ²⁾
Three-month basic average price (see below) in the period before the quarter in which the order was received or the release order took place (average official price) for
- Dysprosium (Dy metal, 99 % min. FOB China; USD/kg)
- Neodym (Nd metal, 99 % min. FOB China; USD/kg)
- Metal factor of the products
Certain products are displayed with a metal factor. The metal factor indicates (for those raw materials concerned) the BOP as of which the surcharges for dysprosium and neodym are calculated using the weight method. An exact explanation of the metal factor is given below.

Three-month average price

The prices of rare earths vary according to the foreign currency, and there is no freely accessible stock exchange listing. This makes it more difficult for all parties involved to monitor changes in price. In order to avoid continuous adjustment of the surcharges, but to still ensure fair, transparent pricing, an average price is calculated over a three-month period using the average monthly foreign exchange rate from USD to EUR (source: European Central Bank). Since not all facts are immediately available at the start of each month, a one-month buffer is allowed before the new average price applies.

Examples of calculation of the average official price:

Period for calculation of the average price:	Period during which the order/release order is effected and the average price applies:
Sep 2012 - Nov 2012	Q1 in 2013 (Jan - Mar)
Dec 2012 - Feb 2013	Q2 in 2013 (Apr - Jun)
Mar 2013 - May 2013	Q3 in 2013 (Jul - Sep)
Jun 2013 - Aug 2013	Q4 in 2013 (Oct - Dec)

Structure of the metal factor

The metal factor consists of several digits; the first digit is not relevant to the calculation of dysprosium and neodym.

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG) ¹⁾
3rd digit	for copper (CU) ¹⁾
4th digit	for aluminum (AL) ¹⁾
5th digit	for lead (PB) ¹⁾
6th digit	for gold (AU) ¹⁾
7th digit	for dysprosium (Dy)
8th digit	for neodym (Nd)

Weight method

The weight method uses the basic official price, the average price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the average price. The difference is then multiplied by the raw material weight.

The basic official price can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. Your Sales contact can inform you of the raw material weight.

Metal factor examples

1. General Provisions

By using this catalog you can purchase hard- and software products as well as services (together hereinafter referred to as "products") described therein from Siemens Aktiengesellschaft subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Note, for products purchased from any Siemens entity having a registered office outside of Germany, the respective terms and conditions of sale and delivery of the respective Siemens entity apply exclusively. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

1.1 For customers with a seat or registered office in European Union

For customers with a seat or registered office in European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the text of the product description, these specific terms and conditions shall apply and subordinate thereto,.
- for stand-alone software products and software products forming a part of a product or project, the "General Conditions for Software Products for Infrastructure & Industry Business (German law)" ¹⁾ and/or
- for consulting services the "Allgemeine Geschäftsbedingungen für Beratungsleistungen für Infrastructure & Industry Geschäft (Deutsches Recht)" ¹⁾ (available only in German) and/or
- for other services, the „Supplementary Terms and Conditions for Services for Infrastructure & Industry Business (German Law) ("BL")" ¹⁾ and/or
- for other products the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry" ¹⁾.

In case such products should contain Open Source Software, the conditions of which shall prevail over the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry" ¹⁾, the Product will be given a note as to which special conditions apply to this open source software. This shall apply mutatis mutandis for notices referring to other third-party software components.

1.2 For customers with a seat or registered office outside European Union

For customers with a seat or registered office outside European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for consulting services the "Standard Terms and Conditions for Consulting Services for Infrastructure & Industry Business (Swiss Law)" ¹⁾ and/or
- for other services the "International Terms & Conditions for Services" ¹⁾ supplemented by "Software Licensing Conditions" ¹⁾ and/or
- for other products the "International Terms & Conditions for Products" ¹⁾ supplemented by "Software Licensing Conditions" ¹⁾

1.3 For customers with master or framework agreement

To the extent products offered are covered by an existing master or framework agreement, the terms and conditions of that agreement shall apply instead of T&C.

2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials.

A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation. The metal factor, provided it is relevant, can be found in the respective product description.

You will find a detailed explanation of the metal factor on the page headed "Metal surcharges".

To calculate the surcharge (except in the cases of copper, dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to copper, the official price from two days prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog – especially with regard to data, dimensions and weights given – these are subject to change without prior notice.

¹⁾ The text of the Terms and Conditions of Siemens AG can be downloaded at
https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf

Appendix

Conditions of sale and delivery

4. Export Control and Sanctions Compliance

4.1 General

Customer shall comply with all applicable sanctions, embargoes and (re-)export control laws and regulations, and, in any event, with those of the European Union, the United States of America and any locally applicable jurisdiction (collectively "Export Regulations").

4.2 Checks for Products

Prior to any transaction by customer concerning products (including hardware, documentation and technology) delivered by Siemens, or products (including maintenance and technical support) performed by Siemens with a third party, customer shall check and certify by appropriate measures that

- (i) the customer's use, transfer, or distribution of such products, the brokering of contracts or the provision of other economic resources in connection with products will not be in violation of any Export Regulations, also taking into account any prohibitions to circumvent these (e.g., by undue diversion)
- (ii) the products are not intended or provided for prohibited or unauthorized non-civilian purposes (e.g. armaments, nuclear technology, weapons, or any other usage in the field of defense and military);
- (iii) customer has screened all direct and indirect parties involved in the receipt, use, transfer, or distribution of the products against all applicable restricted party lists of the Export Regulations concerning trading with entities, persons and organizations listed therein and
- (iv) products within the scope of items-related restrictions, as specified in the respective annexes to the Export Regulations, will not, unless permitted by the Export Regulations, be
 - (a) exported, directly or indirectly (e.g., via Eurasian Economic Union (EAEU) countries), to Russia or Belarus, or
 - (b) resold to any third party business partner that does not take a prior commitment not to export such products to Russia or Belarus.

4.3 Non-Acceptable Use of Software and Cloud Services

Customer shall not, unless permitted by the Export Regulations or respective governmental licenses or approvals,

- (i) download, install, access or use the products from or in any location prohibited by or subject to comprehensive sanctions or subject or to license requirements according to the Export Regulations;
 - (ii) grant access to, transfer, (re-)export (including any "deemed (re-)exports"), or otherwise make available the products to any entity, person, or organization identified on a restricted party list of the Export Regulations;
 - (iii) use the products for any purpose prohibited by the Export Regulations (e.g. use in connection with armaments, nuclear technology or weapons);
 - (iv) upload to a products platform any customer content unless it is non-controlled (e.g. in the EU: AL = N; in the U.S.: ECCN = N or EAR99);
 - (v) facilitate any of the afore mentioned activities by any user.
- Customer shall provide all users with all information necessary to ensure compliance with the Export Regulations.

4.4 Semiconductor Development

Customer will not, without advance written authorization from Siemens, use offerings for the development or production of integrated circuits at any semiconductor fabrication facility located in China meeting the criteria specified in the U.S. Export Administration Regulations, 15 C.F.R. 744.23.

4.5 Information

Upon request by Siemens, customer shall promptly provide Siemens with all information pertaining to users, the intended use and the location of use or the final destination (in the case of hardware, documentation and technology) of the products. Customer will notify Siemens prior to customer disclosing any information to Siemens that is defense-related or requires controlled or special data handling pursuant to applicable government regulations, and will use the disclosure tools and methods specified by Siemens.

4.6 Reservation

Siemens shall not be obligated to fulfill this agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions. Customer acknowledges that Siemens may be obliged under the Export Regulations to limit or suspend access by customer and/or users to products.

5. Miscellaneous

Errors excepted and subject to change without prior notice.

Selection and ordering at Siemens

SiePortal – Ordering products and downloading catalogs

Easy product selection and ordering with SiePortal

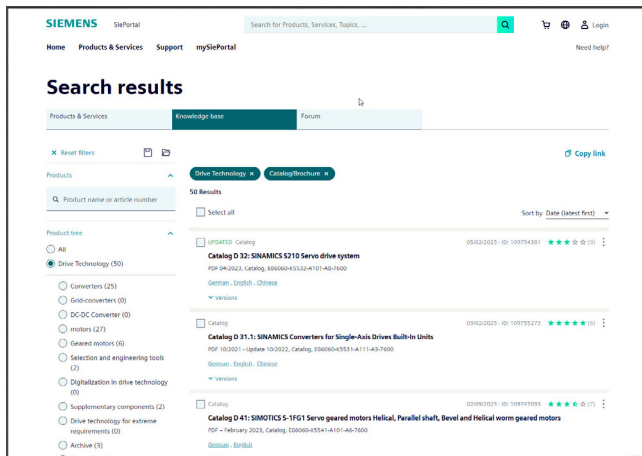

SiePortal > Products & Services

The internet ordering platform of Siemens AG is located in SiePortal. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAX data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit

www.siemens.com/cybersecurity-industry

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under

www.siemens.com/cert

Subject to changes and errors. The information given in this document only contains general descriptions and/or performance features which may not always specifically reflect those described, or which may undergo modification in the course of further development of the products. The requested performance features are binding only when they are expressly agreed upon in the concluded contract.
